#### Declaration of Hazardous Substances in Electronic Information Products

Part name	The Hazardous Substances or Elementary Name					
	Pb	Hg	Cd	Cr(VI)	PBBs	PBDEs
PCB	○	○	○	○	○	○
Plastics	○	○	○	○	○	○
Accessories	○	○	○	○	○	○

This form is prepared according to the provisions of SJ/T 11364.

O: This indicates that the content of the hazardous substance in all homogeneous materials of this component is below the limit requirements specified in GB/T26572.

X: This indicates that the content of the hazardous substance in at least one material of this component exceeds the limit specified by GB/T26572.

#### Reminder:

The 5-year icon refers to the "environmental effective use period," not the product quality guarantee period. Electronic products contain harmful substances such as lead, mercury, and cadmium. Once used beyond their expiration date, these substances may leak or mutate, causing environmental pollution or serious harm to human health and property. The "environmental use period" means that all electronic products are required to be used within this effective period. We will no longer be responsible for the product quality after exceeding the safe usage lifespan.

FCC Warning Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.
