#### Camera

#### **GETTING STARTED**

#### 1. Charging & Powering Baby Monitor

- 1) Connect the monitor adapter to the monitor and a power cutlet.
  2) Unplug the unit when its power indicator turns off, indicating a full charge. Unplug the unit after fully charging the monitor, which can prolong the lifespan of the device.

## 2. Powering Camera

1) Connect the camera to power source via the Type-C cable and camera

Only use the power adapters provided.

Do not place the camera and power cord within the reach of your

#### 3. Pairing the Baby Monitor & the Camera

Based on default setting, one camera is paired with the monitor. When you power on the monitor and camera, the two will automatically pair.

#### Adding a new camera to the baby m

Step 1: 1. Press to enter menu page. 2. Choose and press ok button

Step 2: 1. Select then press ok button.

Step 3: 1. Select i and press K button three

2. Then the monitor will auto-pair with the

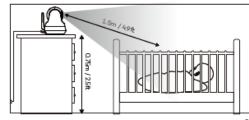

- Once they're paired successfully, the camera number with icon will be shown at the top left.

  It is recommended to pair in the baby's room, or wherever you intend to place the camera.
- High-pitched noises might occur when the monitor is too close to the camera. Please keep them at least 1.5m / 4.9ft apart.
- The monitor can connect up to 4 cameras at once.

#### 4. Placing the Camera

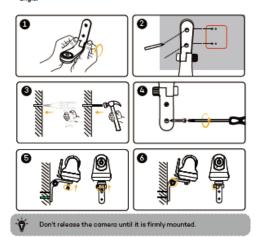

For safety concerns and better vision in night vision mode, if the camera is placed on a 0.75m / 2.5ft table top, the distance from the baby is at least 1.5 m / 4.9 ft . (The baby monitor has an infrared night vision capacity up to 6 m / 19.7 ft ). Most importantly, make sure that the camera power cord is out of your baby's reach)

07

#### 5. Wall Mounting Camera

- 1) Rotate the knob in anticlockwise direction to adjust the wall mount bracket, then fasten the joint and secure the angle.
- Mark the upper and bottom holes with a pencil.
   Drill holes on the wall and insert wall anchors into holes with a hammer.
- 4) Fasten the wall mount bracket with screws.
- 5) Place the camera on the wall mount bracket. Tighten the screw into the threaded socket at the bottom to secure the camera.
- 6) You can maximize your camera unit's viewing angles by tilting the wall mount bracket. Tilt your camera up or down to adjust to your preferred angle.

### **FCC Statement**

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -- Reorient or relocate the receiving antenna.
- -- Increase the separation between the equipment and receiver.
- -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1)this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
