Precautions for use

- •Before using the product, please read the instruction manual carefully and keep it in a safe place in case of urgentuse.
- •Please use the machine carefully, and do not drop or hit it at high altitude to avoid damage to the original machine. Put on the lens protection cap after use to avoidscratches.
- Please use the standard adapter to supply power to avoid excessive bending and damage of the powercord.

High Temperature Attention

•When the projector is working, it is forbidden to block the ai inlet or outlet of the product; the distance between the air inlet/ outlet of the machine and the wall must be at least 30cm to avoid damage caused by excessively high temperature caused by poor ventilation

Electric shock preventior

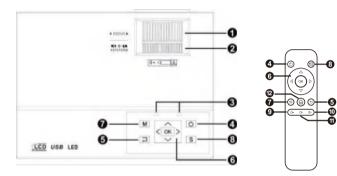

- Prevent foreign objects such as paper dust, wire, screws from falling into the machine. In case something falls into the machine, be sure to turn off the power and take it out by professional maintenance personnel.
- •In order to prevent electric shock, please do not disassemble the machine by vourself if there is any problems with the product. (there are no customer-serviceable parts in themachine).
- To prevent fire and electric shock, do not expose the machine to rain or moisture

Tips:

- •Only play supported formats or decoded content.
- •The picture is clearer and more real in a dim environment
- Electricity safety-Unplug when not in use
- Do not look directly into the lens with your eyes to avoid burning your eyes.
- •Do not use in dusty environment and please keep it on a flat table

1.Adjust the projection

Standard picture

•When the image of the screen is blurred (Figure 1), it is recommended to adjust the focus knob until the image is clear.

•When the image is distorted in vertical trapezoid (Figure 2), it is recommended to adjust the keystone correction knob until the screen is vertical.

Operation Guide

•When the screen is rotated (Figure 3), please place the projector on a horizontal surface.

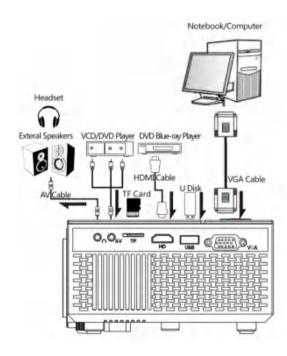

•When the size of the two sides of the screen is different (Figure 4), please adjust the position of the projector so that the lens is facing the screen.

Figure 4 The Size of The Two Ends are Inconsistent

Let the projector lens face the curtain vertically

2.Device Connection

♥ Tips: — Represents the signal flow direction.

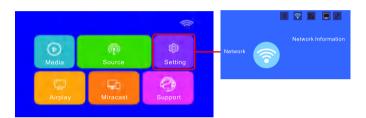

The yellow end of the AV cable is the video signal, white is left channel ,red is right channel.

Operation Guide

3. Same-screen connection instruction for iPhone

The iPhone/iPad and the projector are connected to the same WIFI signal, and then the screen synchronization function is realized.

1 Click "Setting" on the projector to turn on the WIFI network.

2 Connect the WIFI signal. (When the connection is successful for the first time, it will automatically connect each time after the opportunity is turned on.

Note: Only one WIFI signal can be saved)

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
