6. FAQ

- Q: Fail to add device during net-pairing?
A: Please make sure the mobile phone and device are connected to 2.4GHz router. Make sure the correct Wi-Fi password is entered.
- Q: Still fail to add device after re-scanning?
A: If fail to add device, it is recommended to restart the device or power off the device, and try again.
- Q: The device cannot preview?
A: Check for weak Wi-Fi signal. You can place the camera close to the router. If it still doesn't work, reset the device, and add it again.
- Q: Why the device is still on the list after resetting the device?
A: The device resetting only resets the camera's network configuration and cannot change the configuration on the App. You must log in the App to delete the camera from the list.
- Q: How to connect the camera to another router?
A: First log in the App to delete and reset the device, and configure the device again through the App.

Q: Why the device cannot identify SD card?

A: It is recommended to insert and remove the SD card after power off the device. Check if the SD card is under normal service conditions and the format is FAT32. The App shall suggest "could not find SD card" under unstable network of the mobile phone or the device.

Q: The device is online and has an alarm event, but the mobile phone cannot receive the information?

A: First confirm that App allows notification in the settings of your mobile phone. Under normal circumstances, when an anomaly is detected, a message will appear in the notification bar of your mobile phone. You should set a notification sound or vibration in your mobile phone.

In addition, when viewing the real-time video in the App, you cannot receive alarm of the camera being viewed. Because the device defaults the camera being viewed indicating that the user is focusing on the monitoring video, and there is no need for an alarm.

Using the advanced intelligent alarm push algorithm to ensure that the alarm message will not be frequently, but the camera will record all the alarm messages and videos.

After-sale instructions

- 1. Please refer to the real product, the manual is for reference only.
- 2. The product is updated in real time, it shall upgrade without prior notice, please go to the official website for query.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
