⑨ Frequently Asked Questions And Answers

Why can't you wear a watch to take a hot bath?

When bathing, the temperature is relatively high, which will produce a lot of water vapor, which can damage your watch.

Why can't the smart watch receive the message push?

Android phone settings:

1. Make sure the switch of message pushing is turned on in the cell phone APP.

2. Make sure the message can be displayed normally on the notification bar of your phone, the watch message is pushed by getting the phone notification bar message, if there is no message on the phone notification bar, the watch will not receive the push.

(You need to find the notification settings in the phone settings and turn on the notification switch of Facebook, Twitter, phone, SMS and other mobile clients).

Apple mobile phone set

1. Confirm that the message push switch is turned on in the cell phone client.

2. Confirm that the phone messages can be displayed normally in the notification bar.

(You need to find the notification settings in the phone settings and turn on the notification switch of Facebook, Twitter, phone, SMS and other cellphone clients).

If you do not know how to use this smartwatch, you can find in Da Fit: "Me" - "Background Run Protection Guide", follow the steps inside, it will help you solve many problems, if you still do not know how to use it, you can contact our customer service through Amazon, thank you!

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
