### NAME AND CONTENT OF HAZARDOUS SUBSTANCES IN PRODUCTS

| Part Name                            | Harmful materials |    |    |        |     |      |
|--------------------------------------|-------------------|----|----|--------|-----|------|
|                                      | Pb                | Hg | Cd | Cr(VI) | PBB | PBDE |
| Printed circuit assembly             | ○                 | ○  | ○  | ○      | ○   | ○    |
| Small structural parts such as shell | ○                 | ○  | ○  | ○      | ○   | ○    |

This form is compiled in accordance with SJ/T 11364.

○ : Indicates that the content of the hazardous substance in all homogeneous materials of the part is in Below the limit requirements specified in GB/T 26572.

× : Indicates that the content of the hazardous substance in at least one of the homogeneous materials of the part exceeds the limit requirements specified in GB/T 26572.

The parts marked with "x" on the form cannot be replaced by hazardous substances due to restrictions on the global technological development level.

Printed circuit board components\* : including printed circuit boards and their parts, electronic components, etc., Depending on the product model, the product you purchased may not contain all the above components

Electronic and electrical products sold in the People's Republic of China must mark this Logo, the number in the logo represents the product under normal use environmental protection use period.

### FCC WARNING MESSAGES

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- this device may not cause harmful interference.
- this device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
