##### 3.1.3 Test Procedures

1. The EUT was placed 0.4 meter from the conducting wall of the shielding room, and it was kept at least 80 centimeters from any other grounded conducting surface.
2. Connect EUT to the power mains through a line impedance stabilization network (LISN).
3. All the support units are connecting to the other LISN.
4. The LISN provides 50 ohm coupling impedance for the measuring instrument.
5. The FCC states that a 50 ohm, 50 microhenry LISN should be used.
6. Both sides of AC line were checked for maximum conducted interference.
7. The frequency range from 150 kHz to 30 MHz was searched.
8. Set the test-receiver system to Peak Detect Function and specified bandwidth (IF Bandwidth = 9kHz) with Maximum Hold Mode. Then measurement is also conducted by Average Detector and Quasi-Peak Detector Function respectively.

### 3.4.2 Measuring Instruments

See list of measuring instruments of this test report.

### 3.4.3 Test Procedures

1. Configure the EUT according to ANSI C63.10. The EUT was placed on the top of the turntable 0.8 meter above ground. The phase center of the loop receiving antenna mounted antenna tower was placed 3 meters far away from the turntable.
2. Power on the EUT and all the supporting units. The turntable was rotated by 360 degrees to determine the position of the highest radiation.
3. The height of the receiving antenna was fixed at one meter above ground to find the maximum emissions field strength.
4. For Fundamental emissions, use the receiver to measure Average reading.
5. For average measurement: use duty cycle correction factor method per 15.35(c).  
Adjust the center frequency of the spectrum analyzer to the center of the RF signal.  
Set the spectrum analyzer for ZERO SPAN  
Adjust the SWEEP TIME to obtain at least a 100 ms period of time on the horizontal display axis of the spectrum analyzer.

Duty cycle = On time/100 milliseconds

On time =  $N_1 * L_1 + N_2 * L_2 + \dots + N_{n-1} * L_{n-1} + N_n * L_n$

Where  $N_1$  is number of type 1 pulses,  $L_1$  is length of type 1 pulses, etc.

Average Emission Level = Peak Emission Level +  $20 * \log(\text{Duty cycle})$

6. Corrected Reading: Antenna Factor + Cable Loss + Read Level - Preamp Factor = Level

### 3.4.4 Test Setup

For radiated emissions below 30MHz

For radiated emissions from 30MHz to 1GHz

For radiated emissions above 1GHz

### 3.4.5 Test Results of Radiated Spurious Emissions (9 kHz ~ 30 MHz)

The low frequency, which started from 9 kHz to 30MHz, was pre-scanned and the result which was 20dB lower than the limit line per 15.31(o) was not reported.

### 3.4.6 Test Result of Fundamental and Spurious Emissions

Please refer to Appendix C.

### 3.4.7 Duty cycle correction factor for average measurement

Test Plot of Duty cycle

Date: 28.JUL.2023 17:53:23

**Note:**

1. Worst case Duty cycle = on time/100 milliseconds =  $(D2*9+(M4-M3)*28)/100ms = (1.449*9+0.435*28)/100ms = 25.22/100ms = 25.22 \%$
2. Worst case Duty cycle correction factor =  $20*\log(\text{Duty cycle}) = 20*\log(0.2522) = -11.96 \text{ dB}$

## **3.5 Antenna Requirements**

### **3.5.1 Standard Applicable**

§15.203: An intentional radiator shall be designed to ensure that no antenna other than that furnished by the responsible party shall be used with the device. The use of a permanently attached antenna or of an antenna that uses a unique coupling to the intentional radiator shall be considered sufficient to comply with the provisions of this section.

### **3.5.2 Antenna Anti-Replacement Construction**

This EUT uses an integral antenna which is permanently attached.

### 5. Measurement Uncertainty

The measurement uncertainties shown below were calculated in accordance with the requirements of ANSI 63.10-2013. All the measurement uncertainty value were shown with a coverage K=2 to indicate 95% level of confidence. The measurement data show herein meets or exceeds the CISPR measurement uncertainty values specified in CISPR 16-4-2 and can be compared directly to specified limit to determine compliance.

**Uncertainty of Conducted Measurement**
