FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. Radiation Exposure Statement : This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Important Safety Instructions

Read these instructions carefully and retain them for future use. If this product is passed to a third party, then these instructions must be included.

⚠ DANGER Risk of suffocation! Keep any packaging materials away from children - these materials are a potential source of danger, e.g. suffocation.

⚠ WARNING Risk of electric shock! Do not use in or near wet locations such as kitchens or baths.

- Connect the product directly to a grounded power outlet only.
- Do not connect this product in series.
- Do not operate this product covered.
- This product is voltage-free only when unplugged.

Disposal

The Waste Electrical and Electronic Equipment (WEEE) Directive aims to minimise the impact of electrical and electronic goods on the environment, by increasing re-use and recycling and by reducing the amount of WEEE going to landfill. The symbol on this product or its packaging signifies that this product must be disposed separately from ordinary household wastes at its end of life. Be aware that this is your responsibility to dispose of electronic equipment at recycling centers in order to conserve natural resources. Each country should have its collection centers for electrical and electronic equipment recycling. For information about your recycling drop off area, please contact your related electrical and electronic equipment waste management authority, your local city office, or your household waste disposal service.

The status light of your Koosla Surge Protector indicates its current operating status, and this feature will help you determine if your surge protector is operating normally and that there are no wiring issues with your outlet.

Protected: The Protected light indicates that your surge protector is functioning correctly and is providing protection to the devices you have connected to it.

This light should remain ON as long as the surge protector is plugged into an outlet and is turned ON.

If this light goes out at any time, it means that your surge protector has served its purpose on protecting your equipment against damaging voltage fluctuations, surges, or spikes.

If this happens, your surge protector should be replaced.

Grounded/Earthed : The Grounded or Earthed light indicates that your surge protector is connected to a properly grounded outlet. If this light is not ON, you may have a ground-wiring problem and should contact an electrician to inspect and properly ground the outlet. Not Grounded / Not Earthed Light

The Not Grounded or Not Earthed light indicates that your surge protector is not connected to a properly grounded outlet. If this light is ON, you may have a ground-wiring problem and should contact an electrician to inspect and properly ground the outlet.

NOTICE

DO NOT OVERLOAD the product's outlets. The product can accommodate a total equipment load of up to 15 A (1875 W) (whether plugged into a single outlet or spread out over multiple outlets).

If the load exceeds 15A, the built-in circuit breaker will trip and the outlets will stop providing power. In such case reduce the load by unplugging some devices and again set the power switch to RESET position.

SOECIFICATIONS

Model	SP1123UW
Current	15A
Voltage	110-125V~
Power	1875W MAX
Frequency	50 / 60Hz
Cable	3X14AWG 2.08mm ²
USB output	5V=4.8A(Total)
Wireless Charger	15W MAX
Product size	4.9 x 4.9 x 7.9 inch
Surge protection	1500J

Made in China
