

USER MANUAL

SPECS:

Padfolio Size: 8.8 x 6.8 inches
Power Bank Size: 6.7 x 3.9 inches
Power Bank Capacity: 8000mAh
USB-C Input: 5V-2A

USB-C Output: 18W
USB-A Output: 18W
15 Watt Wireless Charger
Dot Grid Journal

POWER BANK:

1. Wireless charging area
2. Battery indicator light
3. Power ON/OFF
4. USB-C Input/Output
5. USB-A Output

CHARGING THE POWER BANK:

Prior to using the power bank for the first time, make sure to have it plugged in for at least 8 hours, even if the battery light indicator shows that it is fully charged. The power bank is charged using the USB-C input slot. Plug in the appropriate cable (USB-C cable included) to the appropriate slot and connect the other end to a reliable power source, such as a laptop or USB wall plug. Blue light will flash indicating the power bank is charging.

USING THE WIRELESS CHARGING FEATURE:

Turn on the power bank by pressing the power on/off button (3). A solid blue light will indicate the power bank is on.

Place your wireless charging capable device directly on top of the indicated charging area (1). The blue light should stay illuminated during charge.

Note: Ensure your device has wireless charging capabilities prior to attempting to wireless charge. Only one device can be wirelessly charged at a time.

USING THE WIRED CHARGING FEATURE:

Turn on the power bank by pressing the power on/off button (3). A solid blue light will indicate the power bank is on.

Plug in appropriate charging cable with the output end in to the USB or USB-C output slots (4/5). Then plug the other end into your device to begin charging.

HELPFUL TIPS:

- Ensure your device allows for wireless charging before attempting to use the wireless charger.
- Make sure there are no thick/magnetic materials between the phone and power bank. Most phone cases can be left on while wirelessly charging, but abnormally thick cases, phone grips, and magnetic strips may interfere with the power bank's performance.
- When placing your phone on the wireless charging area, make sure it's placed parallel to the power bank (the same direction as the power bank). Not all smart phone models will have the wireless charging receiver in the same location. Try adjusting the phone at slightly different angles until you find the "sweet spot" if your phone is not responding to the charge.

SAFETY:

- Do NOT use the power bank to wirelessly charge smart watches.
- It is recommended to keep a minimum distance of 6 inches between the power bank and any implanted medical devices.
- Keep the power bank dry, and do not store in any extreme hot or cold environment.
- Do not disassemble the device.
- In case of abnormal behavior, discontinue use.

NOTE: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
