Exception Handling

a. Problem : Unable to connect the device automatically.

Reasons and treatment methods:
1: the first use of the product needs to manually connect to Bluetooth, it automatically goes back to the last paired Bluetooth device when next time.
2: Check whether the product is connected to other Bluetooth devices.
3: Check whether the Bluetooth device is on and in a relatively close range.
4.Restart the machine once or reset the product.

b. Problem: Cannot search the product Bluetooth.

Reasons and treatment methods:
1: Check whether the product is connected to other Bluetooth devices.
2: Check whether the product is in the Bluetooth waiting connection state.
3: When pairing, the pairing device is within a close range of the product.

c. Problem: Cannot turn it on.

Reasons and treatment methods:
1: the battery power is too low and the product can not be started, charging the product.
2: Check whether the product charging is normal.

Exception Handling

d. Problem: The sound of the product is low.

Reasons and treatment methods:
1: The product is not fully deployed or the horn sound area is blocked.
2: The product volume is not added to the maximum, manually increase the product volume(some Android devices have no volume synchronization when connected) exception handling

e. Problem: The Bluetooth transmission distance is short.

Reasons and treatment methods:
1: The product is placed in a place with complex interference signals (microwave oven, signal transmitting equipment, etc.), and the mobile product is far away from the interference source equipment.
2: Place the product in a place with shielding or blocking signals (metal desktop or device), and move the product position.

f. Problem: Unable to charge.

Reasons and treatment methods:
1: Check whether the charging cable is fully normally inserted into the charging port of the product.
2: The product charging voltage is 5V, it cannot use the charging function if the voltage is too high or too low , replace the charging adapter.

Specifications

Bluetooth version	Bluetooth 5.3
Battery	3.7V/2000mAh
Output power	5W*1
Maximum power	8W
Frequency response	60Hz-20KHz
S/N Ratio	≥75dB
Play time	≥10H(depend on volume and light)
Input power	5V/1A
Charging time	2.5-3H
Transmission	≥10M
Waterproof	IPX7
Dimension	108*108*54mm
Weight	230g

Safety Instruction

Safe battery use : 1.Do not remove the product or replace the battery without permission to avoid the battery exposure to high temperature or fire.
2. Do not subject the product or battery to mechanical impact to avoid battery short circuit.
3. Do not charge the product unattended.
Product with magnetic and small objects : The product with small accessories, children should be used accompanied by parents, beware of the risk of accidental eating and suffocation. Product components contain magnets that may interfere with human implants such as pacemakers, and should be used away from people wearing pacemakers and other implants in case of accidents.
Safe use environment : 1.This product is used away from high temperature and flame.
2.The product should be placed in a flat and stable plane in a normal temperature and humidity environment.
3. Do not use this product in an environment where attention is required (such as when walking on the road or driving).
Cleaning method emphasizes : Do not use corrosive cleaning agent. Do not directly dry with high temperature flame.

Dear Value Customer:

Thank you for purchasing our COMISO's products. To ensure you have a better experience for the product, please read this manual carefully before using it. If there is any quality issue of our product, please contact our service team support@comiso.com.cn. We will provide you with the best and quickest support.

Sincerely
COMISO

Important note
Please use a 5V power adapter to charge this product.

FCC Caution:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
