### 1. Test procedures

| Name                         | Parameter            | Method   | Standard No.           |
|------------------------------|----------------------|--|------------------------|
| Mobile communication antenna | VSWR                 | Generic specification for antennas used in the mobile communications | GB/T 9410-2008         |
|                              | Antenna Gain         |  |                        |
|                              | Radiation pattern    |  |                        |
| Antenna                      | Radiation efficiency | IEEE Standard Test Procedures for Antennas                           | ANSI/IEEE Std 149-1979 |

### 2. Test Equipment

| Equipment                  | Model No.   | Serial No. | Manufacture   | Calibration Date | Next calibration Date |

The uncertainty was calculated on the basis of the GUM published by ISO, using the inclusion factor of K=2 and the 95% confidence level to express the extended uncertainty.

| Item                 | uncertainty |
|----------------------|-------------|
| Antenna gain         | ±1dB        |
| Radiation efficiency | ±10%        |
