1 System Description

1.1 System Home Page

After the boot is completed, the system will enter the main interface by default.

1.2 Sidebar

1.2.1 Function Introduction

The sidebar is divided into left and right sidebars, click on the icon that is hovering on the

left/right side of the screen, such as  、  to bring up the sidebar. The function keys in turn that are expanded are: return, home page, task, annotation, signal source, and notification center. The sidebar will be hidden automatically after 5S without any operation.

1.2.2 Return

Click  the icon to return or exit the current page.Home page.

1.2.3 Home

Click  icon to enter system home page.

1.2.4 Task

Click  icon, to enter the task management interface, where you can select to open or close the application.

- (1) In multi task state, touch the task list area and slide up and down to view the task list.
- (2) Touch the task thumbnail to slide left or right until it slides out of the task list area to release the thumbnail.
- (3) Touch the task thumbnail to enter the task interface.

1.2.5 Annotation

Click  the icon to open the comment.

Toolbar operate introduction:

Click  : The current brush mode, pop up books to write dishes, you can set the brush color and brush size.

Click  : Enable eraser.

Click  : Currently in the annotation mode, exit the annotation mode, and enter the new annotation page.

Click  : Open the comment drop-down menu.

Click  to select QR code sharing to realize code scanning and taking away.

Click  to import whiteboard.

Click  to exit annotation.

1.2.6 Signal Source

Click  the icon to the list of signal source channels, and users can choose to switch the required channels.

1.2.7 Notification Panel

Click  the icon to pop up the side menu, as shown in the figure below. The panel contains widget display, common application shortcut function, custom add application, brightness, sound, and notification center information.

1.3 Notification Panel

1.3.1 Pop up Introduction

Click  the navigation bar icon, as shown :

1.3.2 Function Introduction

1. Calendar

Click  the icon in the side menu to pop up the calendar. The user can view the time and mark and add events.

2. Child lock

Click  the icon and the system will enter the lock screen state. At this time, the touch, key and remote control functions are locked and cannot be used.

The unlocking ways are as follows:

(1) Password unlock: Click and enter 2580 in turn, and click OK to unlock. (the initial password is 2580, the user can enter the settings to change the password).

(2) Remote unlocking: Press F9 to unlock quickly.

(3) Combination key unlock: Press the signal source key twice, and then press the sound plus and sound decrease.

Note: It is necessary to press the sound addition and subtraction in the signal source interface.

3. Energy saving

Click  to enter the state of turning off the backlight of the screen. Touch the screen or press the button or the energy saving key of the remote control to turn off the energy saving.

4. Screen capture

Click  to achieve full screen capture, free screen capture and other operations on the screen.

5. Eye protection

Click  to turn on or off the eye protection function.

6. Spotlight

Click  to call out the spotlight function to highlight the content to be highlighted.

7. Take photos

Click  to open the camera function.

8. Curtain

Click  to open the screen function and block the screen content with the existing background template.

9. Custom

Click  to achieve the user to add common applications.

10. Brightness and sound adjustment

(1) Brightness adjustment: Touch slide backlight progress bar

  , user can adjust the brightness of the screen backlight.

(2) Sound adjustment : Touch slide sound progress bar

  , user can adjust the conference machine sound size.

11. Notice column

Click  icon to open system app notifications or third-party app notifications are displayed together on the notification bar, click Open, slide to delete.

12. Quick application

(1) Click the application icon to enter the corresponding application.

(2) Click **More** to customize shortcut apps according to your preferences.

13. Bottom column

(1) OPS: Click  the icon to switch directly to the built-in computer channel.

(2) Shut down: Click  the icon to turn off the all-in-one machine.

(3) Setting: Click  the icon to enter the system setting interface.

1.4 Status bar

The status bar mainly displays the current network connection status, current machine temperature, sound, brightness, and also contains the wallpaper, channel, settings, and quick access to shutdown . As shown in the figure:

1. Connection status: 

Unconnected state: 

2. Click  : Display the current temperature of the machine;

3. Click  : Adjust the sound of the machine;

4. Click : Adjust the brightness of the machine;

5. Click : Click settings to enter the wallpaper interface;

6. Click : Enter setting interface ;

7. Click : Execute shutdown operation.

1.5 System setting

System settings mainly include personalized, network, intelligent, system and other functional settings.

1.5.1 Personalization

The general settings interface can adjust the system's voice and brightness, change the system theme wallpaper.

1. Basic

Device name: Displays the current name of the machine, and the user can customize the name of the device.

Network MAC: Displays the MAC address of the currently connected network.

Boot screen / Animation: Display the current start-up screen/animation, click the setting to customize the start-up screen/animation (please follow the on-screen prompts when customizing the start-up screen and animation).

2. Theme

Humanized design, you can change the theme style;

Topics include regular themes and style themes;

Regular themes include: classic theme, conference theme, education theme, science and technology theme;

Classic theme

Science and technology theme

Meeting theme

Education theme

Style theme is: National style theme, financial theme, party building theme, medical theme, industrial theme, transportation theme, cartoon theme, enterprise theme; each style theme includes three different pages of the application theme.

3. Wallpaper

Wallpaper is divided into static wallpaper and dynamic wallpaper. Click the

corresponding wallpaper image to change the wallpaper. Static wallpaper can be added by yourself. Pictures of built-in storage and external storage can be added. The added wallpaper is displayed after the static wallpaper. Click the icon to execute the deletion function.

1.5.2 Network

Under the network interface, users can set wired network, wireless network, wireless hotspot and Bluetooth and so on.

1. Wired network

Under the cable network interface, users can view the MAC address, IP address and other information. The automatic access to the IP address is opened by default, and the parameters such as the IP address and the subnet mask can be manually modified after the automatic acquisition is closed.

2. Wireless network

Turn on the wireless network switch button, and the available wireless network will be obtained and displayed automatically.

3. 2.4/5G hotspots

Under the 2.4 hotspot / 5G hotspot setting interface, user can change the hot spot name, security, password and other parameters.

Note: 2.4G hotspot and 5g hotspot cannot be opened at the same time. After

modification, you must click save.

4. Bluetooth

(1) When the integrated machine supports Bluetooth function, Bluetooth pairing can be implemented here to achieve Bluetooth transmission function.

(2) When the integrated machine does not support the Bluetooth function, the Bluetooth function switch date will be grayed out and unavailable.

1.5.3 Intelligence

Under the intelligent setting interface, user can change printing setting, energy saving mode, timing switch on / off, channel setting, security setting and more.

1. Channel setting

Intelligent recognition: When intelligent recognition is on, the channel will automatically jump to the channel when it detects the signal.

Boot channel: Click to set boot channel or click Custom channel name .

Click  to set boot channel , or click  Custom channel name.

No signal blue screen: When the switch is on, no signal of channel is displayed as blue screen interface.

2. More functions: Power button, suspension menu, sidebar, photosensitive, centralized control, temperature monitoring, five finger turn off screen, three finger turn off screen and other functions can be set.

1.5.4 System

The system setting options are mainly for language and input method, time and date setting, image and sound setting and system update and upgrading, etc. you can also view the system version information and storage usage.

1. Language and input method: Click  to set the language (Chinese, traditional Chinese, English, Arabic, Spanish, French, Italian, Japanese, Portuguese, Russian, etc.) and input method.

2. Time and date: Turn on the automatic setting time. If the networking is successful, the current network time will be automatically synchronized. When the automatic setting time is off, the date and time can be set manually.

Click  to modify time zone.

3. Sound: Adjust sound and set sound mode, output device.

Sound mode: Standard, news, music, cinema, sports, user.

User voice output device: Speaker, coaxial, Bluetooth, USB mode.

4. System information: You can view the system version information and the usage of built-in storage.

5. System update:

(1) Restore factory settings: Click Reset to restore the factory settings.

(2) Local upgrade: Copy the firmware to the root directory of the U disk, insert the USB flash disk into the multimedia USB interface of the all-in-one machine, and select local upgrade and update.

2 Software Description

2.1 Writing Whiteboard

2.1.1 Interface Display

Click  the whiteboard icon in the main interface to start the whiteboard software.

1. The whiteboard is selected by default and can be written directly.
2. Support single point mode and multi-point mode, multi-point support up to 20 points.
3. Single point mode, two fingers or more to perform zoom roaming function. It supports single stroke mode and double stroke mode, and the double pen mode is for stroke writing.
4. Support small tools, insert pictures and shapes, draw lines and arcs. You can also use some of the system's small tools, such as camera, calendar, calculator, etc.

2.1.2 Menu

- b. Click  icon to bring up the eraser function.

(3) QR code sharing: Click  icon to save theme interface signature image, If the network is be connected , user can use the mobile phone to scan the QR code to view and download the saved theme image:

2.4 Multi-screen Interactive

2.4.1 Application Note

The main function of this application is to wirelessly transmit the content of mobile phones, tablets or computers to the conference all-in-one machine, and truly realize the wireless screen transmission function of the projection device and the projected device (note: mobile phones, tablets or computers need to be On the same local area network as the conference tablet).

2.5 Operating Instructions

1. Click  (multi-screen interactive) icon to open the multi-screen interactive interface, and the application display interface is as shown.

IOS system does not need to install the client.

DevName : RECV_B924E9
HotSpot :
Password:

2. Function activation

Click trial activation to test and use, commercial activation charges.

3. Operating description

Android mobile phone connection network, scan the multi-screen interactive interface QR code to download and install application software (Apple mobile phone does not need to download);

The mobile phone needs to use the same network as the all-in-one. The Android mobile phone can open the transcreen to cast the screen, and the Apple mobile phone can open the Air Play connection device to cast the screen.

Android

IOS

2.5.1 Special instructions for multi-screen interactive interface

1. Device name

Version information: Projector software version.

Activation information: View activation status.

Device name: View and modify the equipment name.

Connect code type: Select the type of screen projection code.

Connect Code Setting: Screen throwing code switch setting and suspension

Full screen of horizontal image: Full screen when image horizontal screen is opened.

System volume can be adjusted: Turn on to adjust the system volume .

Display PPT slide change icon: Display ppt page turning icon after opening.

Display window control bar in multi split screen: Display window control bar when multi split screen is turned on.

Center display at the bottom of the third screen: When the bottom display of the third screen is turned on, it will be displayed in the middle.

Split screen display mode: Single split screen, double split screen, four split screen.

2.5.2 Computer Screen

The screen projection of the computer needs to be used with the video sharing. The video is as shown below :

The operation of the computer screen is divided into two parts: the video sharing and the conference machine are matched and the video is connected to the computer.

Note: Before using the Vision Sharing wireless screen function, user need to make sure that the screencast hotspot is turned on.

1. Vision sharing matches the conference machine

The videophone is plugged into the USB port of the conference machine and paired with the conference machine. The conference machine interface displays the match.

The projector flashes blue light, and it is pairing with the conference panel, and the software is installed. The blue light no longer flashes, and the pairing is successful.

2. Vision sharing and computer pairing

1). Running pairing

Automatic running: The video is plugged into the computer's USB port (such as a notebook) and paired with the computer. The indicator light of the accessory is always flashing blue and is being paired with the computer.

2). Pairing completed

When the connection between the video and the computer is successful, the computer will pop up the "Click the button on the wireless transmission to start the screen" prompt, and the indicator light of the accessory will no longer flash blue.

3). Screen sharing

Press the Vision button, the blue light will be dimmed, that is, the screen sharing will be successful, and the screen and sound of the PC will be mirrored to the smart conference machine; press the button again, the screen will exit, and the screen will be shared .

2.5 More Applications

2.5.1 APK Application APK

Click , the More Apps icon to enter the More Application interface of the conference system. Users can view or open the APK application installed by themselves in this interface, as shown in the figure.

2.5.2 Floating Menu

1. The icon  floating on the desktop can be moved freely and displayed in any interface. Click Open to quickly launch the application inside the menu, or you can customize to add other apps to the floating menu bar.

2. Add: Click  Add user custom shortcut apps and gadgets to the hover menu.

3. Delete: Long press the app icon you want to delete to enter the editable state, click  to delete the app's shortcut icon.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
