Antenna specification table:

1: Antenna is a whip antenna:

Whip antenna uses copper core RF wire, transmitting antenna size: 0.8 * 70mm, whip antenna needs to be vertically welded to the PCB plate,

There is no requirement for PCB plane size, but the height requirement is required (greater than 30mm). This antenna communication is better communication than the other four PFIA antennas
The distance is further, about 20% higher.
2: Technical data sheet:
