

PEM 102

Remote Control Manual

Product introduction

Technical data

- Power : 3V (CR2032)
- Frequency : 433.92MHz
- Working current : $\leq 20\text{mA}$
- Operating temperature : $-20^{\circ}\text{C} \sim +60^{\circ}\text{C}$
- Distance : $\geq 100\text{m}$ (open space)

Working temperature

Warning

- The remote control shall not be affected by moisture or impact, so as to avoid affecting its life.
- In the process of use, when you find that the remote control distance is obviously close or not sensitive, please check whether the battery needs to be replaced.
- Press any button for more than 10 seconds, and the transmitter will stop sending wireless signals.
- Please properly dispose of the used battery according to the instructions.

FCC STATEMENT:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
