MAXTASY

STROKE MASTER

USER MANUAL

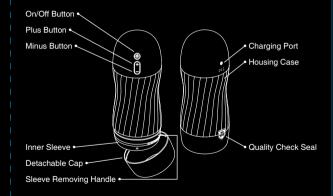

THE MOST REALISTIC LIFE-LIKE PENETRATION EXPERIENCE STROKER

#engineered4pleasure

Congratulations on your purchase of Stroke Master+, the world's elite pleasure stroker equipped with hyper powerful motor offering almost unlimited torque and unparallel stroke depth.

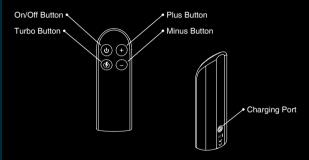

Please take a moment to read through this user manual before using the stroker.

YOUR STROKE MASTER+

REMOTE CONTROL

CHARGING

Make sure to charge your STROKE MASTER+ together with the remote before the first use.

In case the battery is getting low, the LED around button area starts flashing fast. Insert the DC plug into the DC port. LED will start flashing slowly indicating charging. Once fully charged LED stops flashing. Charge at least once every 6 months to protect and extend battery lifetime.

IMPORTANT: Use only original USB charging cable provided with your MAXTASY product. USB adapter must not have higher charging current than 1A (one amper).

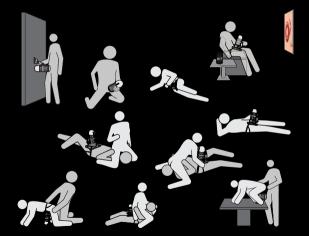

HOW TO USE

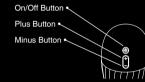

- 1. Remove the cap and the sleeve inner support
- 2. Wash the inner sleeve in warm soapy water before the first use
- 3. Lube up inner sleeve
- 4. Lube up your penis
- 5. Insert penis
- 6. Enjoy
- 7. Clean immediately after use, following cleaning instructions

IMPORTANT: For the most pleasurable sensation, always apply a generous amount, at least 15ml/0.5oz, of water-based lubricant to the penis and the inner side of the sleeve prior to use.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
