- How to start: First, turn off the power switch. Then press and hold the WIFI button until the red light is on. Finally, turn on the power switch to enter into the display mode.
Safety Instruction

- Do not squeeze, fold or bend Nitetronic Anti-snore Smart Pillow excessively, as it may damage the sensors and the built-in air bags.
- Nitetronic Anti-snore Smart Pillow must be used with the original power adaptor. Using third party adaptor may cause damage to the device.
- The power supply should be connected to an easily accessible socket so that it can be quickly disconnected if the power connection goes out.
- Do not use the Anti-snore Smart Pillow near an electric blanket, hot water bottle or similar heating appliances, as high temperature may damage the device.
- Do not cover the power adapter with a blanket. Do not put the power adapter near a heat source and keep it away from direct sunlight, as overheating will cause damage to the device.
- Keep the Anti-snore Smart Pillow away from moisture, dust and corrosive gas and liquid.
- Do not use the pillow when it cannot work properly or its components may be damaged.
- Refer to the "Cleaning and Maintenance" section of this user manual to avoid dirt and bacterial contamination.

Non-application

- Patients with intracranial electrode.
- Patients with heart pacemaker.

⚠ Patients with obstructive Sleep Apnea Syndrome (OSAS) shall consult the doctor before using Nitetronic Anti-snore Smart Pillow.

Cleaning and Maintenance

- The pillowcase is removable and it is recommended to wash according to the instructions on the washing label (inside the pillowcase).
- Please do not remove the inner protective cover to avoid damaging the sensitive technological components in the pillow. Our warranty does not cover damages caused by inappropriate uses.
- The internal pillow can not be washed or dry-cleaned. After removing the pillowcase, place the pillow in a ventilated area and gently wipe the surface of the protective inner-case with a damp cloth to remove dust or stains.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

*RF warning for Mobile device:

This equipment complies with?FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
