# Features At A Glance

## Send Photos

Use the Skylight app to send dozens of photos at once or attach up to 25MB of photos when emailing to your unique Skylight email address, and the photos will automatically appear on your tframe.

## Swipe

When photos arrive, they'll play in a slideshow. Swipe to view additional photos.

## Zoom

To zoom into a photo so it fills the screen, take two fingers (e.g. your two index fingers), and pinch to zoom.

## Heart Button

If you love a photo, tap the heart button in the lower-right corner of the screen, and we'll email the sender to tell them you loved it! You can also hide the heart button by going to Settings > Advanced tfeatures.

## WiFi

Skylight requires WiFi for initial setup and to receive new photos, but you can still view new photos without a WiFi connection.

## Skylight Plus

If you have purchased the **Skylight Plus plan**, you can manage all of the tframes under your account and gain access to these premium features:

### Mobile App

Additional access to view photo history and control your tframe remotely, and more.

### Albums

Create, edit, and view photo albums in the app and on your tframe.

### Videos

Send videos to your tframe via email, mobile app, or Skylight Web ([app.ourskylight.com](http://app.ourskylight.com)). Video sound can be enabled on your tframe.

### Captions

Send photos with captions using the app or Skylight Web.

Skylight Plus can also be purchased in-app or at [www.skylightframe.com/plus](http://www.skylightframe.com/plus).

# Getting Started

1. **Plug the power adapter into an outlet**

Plug the round end of the cord into the port on the back of your tframe marked 'POWER'. Insert the stand into one of two slots marked 'STAND', pushing firmly.

2. **Download the Skylight app**

Search "Skylight App" in your app store or scan the QR code below. With the app, you can view and send photos from your tframe, like and comment on photos, and more.

Scan to  
download

## Connect to WiFi

1. **Select your network**

A list of available WiFi networks will appear on the right side of the screen. Tap to choose your network from the list. Swipe up if the list is long. If your network does not appear, wait for 30 seconds and check once more.

2. **Enter your password**

If your WiFi requires a password, a prompt will appear. Type in your password using the onscreen keyboard.

# Activate

## 1. Create your Frame's email address

Download the app or visit [ourskylight.com/finalstep](https://ourskylight.com/finalstep) to make an account and activate your tframe. Make sure you select "tframe" for device type.

## 2. Use your code

Once you have created your tframe's email address, our system will give you a 6-digit code. Enter this code on your tframe using the on-screen keyboard.

## 3. Configure Settings

Access your tframe's settings by tapping on the gear icon to find your device's email address and configure your device.

# Share

## Invite Others

Share your tframe's unique email address with the whole family, or invite them to send directly from the app. The more people you invite, the more photos you'll get!

## Send Photos

Share photos via email (as attachments) or upload from the app. The subject and contents of an email don't matter - Skylight just grabs attachments.

## Rotate

Your photos will automatically rotate to accommodate your tframe's displayed orientation. You can also rotate photos by tapping the screen and selecting rotate from the menu bar.

# Settings

Tap the screen to see the Settings Bar. From here, you can access:

- **Delete:** Remove photos from your tframe
- **Rotate:** Rotate photos on your tframe
- **Pause:** Pause on your favorite photos
- **Albums:** View and manage your albums (Plus feature)
- **Gallery:** View all of your photos and albums

## Advanced Features

Change the slideshow speed or shuffle your photos.

## How It Works

Check your Skylight email address, check your Wi-Fi status, or reset your Wi-Fi.

## Sleep Mode

Ensure your Skylight screen goes to sleep at the same time each night and wakes up at the same time each morning.

*You can manually enter sleep mode or create an automated sleep schedule for your Frame.*

# Need Help?

If you have any questions about how to use or set up your Skylight tframe, please visit our **User Guide** at [skylightframe.com/support](https://skylightframe.com/support). Or contact us at [help@skylightframe.com](mailto:help@skylightframe.com)

Make sure to download the Skylight app to get the most out of your tframe!
