## user 's manual

Please read this manual carefully before using the product and keep it properly for reference

Thank you for choosing to buy our products, this product is a home car dual-purpose wireless charger. use Standard wireless charging technology, compatible with Q standard wireless charging mobile phone, with anti-skid function, It can charge digital appliances with Qi wireless charging function.

### Product introduction

#### Product parameter

Product name: wireless charging launch pad	Product model: C9
Wireless standard: QI standard	Wireless power: 5W/7.5W/10W/15W
Input size: 5V/2A, 9V/1.67A	Conversion power: ≥75%
Wireless distance: ≤8mm	Product color: black
Product size: 158*75*8mm	Applicable mobile phone: QI mobile phone

### Installation and use

#### 1. Installation instructions

Connect the wireless charger to qc3.0 power supply and enter the power on state.

If your digital product has wireless charging function, it will be charged automatically if you put it directly on the product

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
