Appearance

White Light
Smart motion-activated white light LED provides colorful images at night.

Microphone
Built-in microphone.
Note: Don't insert objects into the microphone hole.

LED Indicator

Lens

MicroSD Card Slot
Insert a microSD card (not included) for recording. Max. 256GB is supported.

Speaker
Note: Do not insert objects into the speaker hole.

Understanding LED indicator status lights and information:

The color of the LED indicates the device's current status.

LED	LED Status	Device Status
🔴	Red light on	Device booting
◐	Red light blinking	Waiting for Wi-Fi configuration
🔵	Blue light on	Wi-Fi connected
◐	Blue light blinking	Operating in app
🔴	Blinking between red and blue	Network disconnected
🟣	Purple light on	Firmware upgrading
⚫	Light off	Power off / rebooting after reset

Reset Button

Use the reset needle pin to poke the reset button, and hold for 3 seconds to reset.

Mounting Plate

Reset Button
Use the reset needle pin to poke the reset button, and hold for 3 seconds to reset.

Type-C Port

Connect the power cord.
Type-C Port
Connect the power cord.

Insert a MicroSD Card

Your recording footage can be saved continuously into a MicroSD card (not included) and played in your Napcat Life app. The camera will overwrite the oldest files when the MicroSD card storage space is full. See the instructions below to insert a MicroSD card:

1. Tilt the camera lens up, then you will find the MicroSD card slot.

2. Holding the MicroSD card in the correct orientation, and then insert the MicroSD card into the slot carefully. Push the MicroSD card until you hear a clicking sound.

Set Up Your Camera

Follow the steps below to get started with your new camera.

Step 1. Download Napcat Life APP

Get the **Napcat Life** app from the APP Store or Google Play.

Napcat Life

Download on the App Store

Get it on Google Play

Or download the APP by scanning below QR code.

Recommended System Specifications

Wi-Fi 802.11 b/g/n
iOS version 11.0 or higher
Android version 6.0 or higher

Step 2. Login

Run the app, and login with your account ID. If you don't have an account, please sign up firstly.

Step 3. Configure Camera

Login the app, tap "+ Add Device" and scan the setup QR code on the device, and then follow app instructions to configure your camera and add it to your home network.

Step 4. Place Camera

Place your camera on a flat surface, or mount it on a wall or ceiling.

• Place on a flat surface

Keep the gap between objects and the side of the camera lens more than 10 inches (25cm) to avoid overexposure caused by IR light reflection.

Gap>10inches(25cm)

Gap>10inches(25cm)   Gap>10inches(25cm)

• Mount on ceiling

Screw hole positioning card.

Place the mounting bracket.

Drill and install anchors. Anchors are not required if the wall is made of wood.

Press the camera to the mounting bracket and rotate clockwise to the right position.
Screw the mounting bracket into position.

Note:

1. If you want to remove the camera from wall or ceiling, rotate the camera anticlockwise.

2. If your camera is ceiling mounted, its captured images will be turned upside-down. Please login Napcat Life app home page, and click "Mirror" to adjust the image.

Tips for Camera Placement

Don't face the camera towards any strong light sources.

Do not point the camera towards a glass window. Or, it may result in poor image performance because of the window glare by infrared LEDs, ambient lights or status lights.

Do not place the camera in a shaded area and point it towards a well-lit area. Or, it may result in poor image performance. For better image quality, please make sure that the lighting condition for both the camera and the capture object is the same.

For better image quality, it's recommended to clean the lens with a soft cloth from time to time.

Make sure the power ports are not exposed to water or moisture or blocked by dirt or other elements.

Troubleshooting

Camera Is Not Powered On

If your camera is not powered on, please try the following solutions:

• Plug the camera into another outlet.

• Use another 5V power adapter to supply the camera.

If these won't work, please contact Napcat support:
support@napcat.net

Wi-Fi connection failed during initial setup process

If the camera fails to connect to Wi-Fi, please try the following solutions:

• Please make sure the Wi-Fi band meets the network requirement of the camera.

• Please ensure you have entered the correct Wi-Fi password.

• Put your camera close to your router to ensure a strong Wi-Fi signal.

• Change the encryption method of the Wi-Fi network to WPA2-PSK/WPA-PSK (Safer encryption) on your router interface.

• Change your Wi-Fi SSID or password and make sure that SSID is within 31 characters and password is within 64 characters.

• Set your Wi-Fi password using only the characters or digits on the keyboard.

If these won't work, please contact Napcat support:
support@napcat.net

Notification of Compliance

 Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions,

may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular

installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirem
-ent.
To maintain compliance with FCC's RF exposure guidelines, the
distance must be at least 20 cmbetween the radiator and your body,
and fully supported by the operating and installation
