

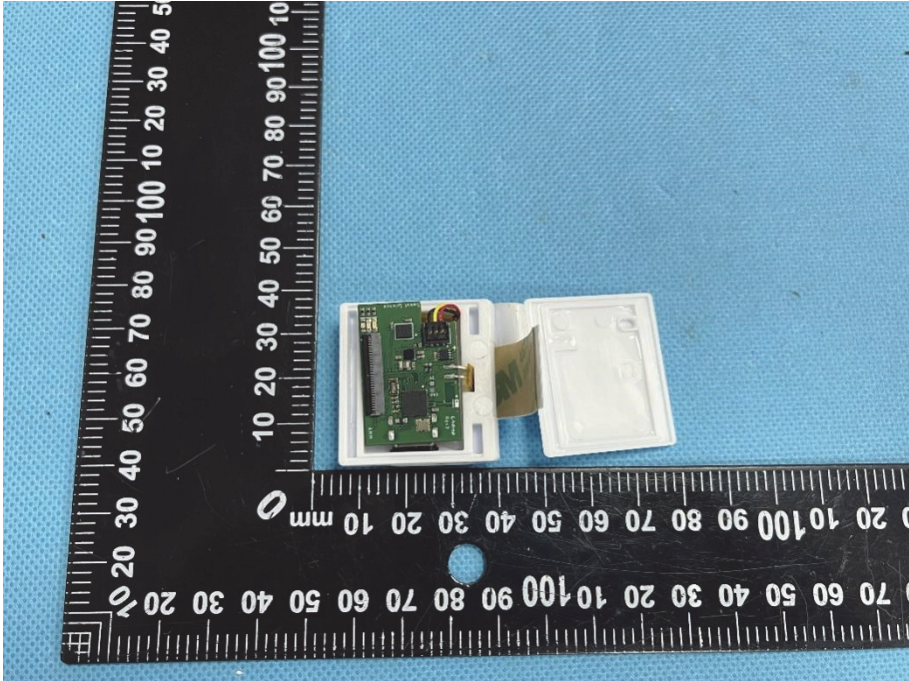

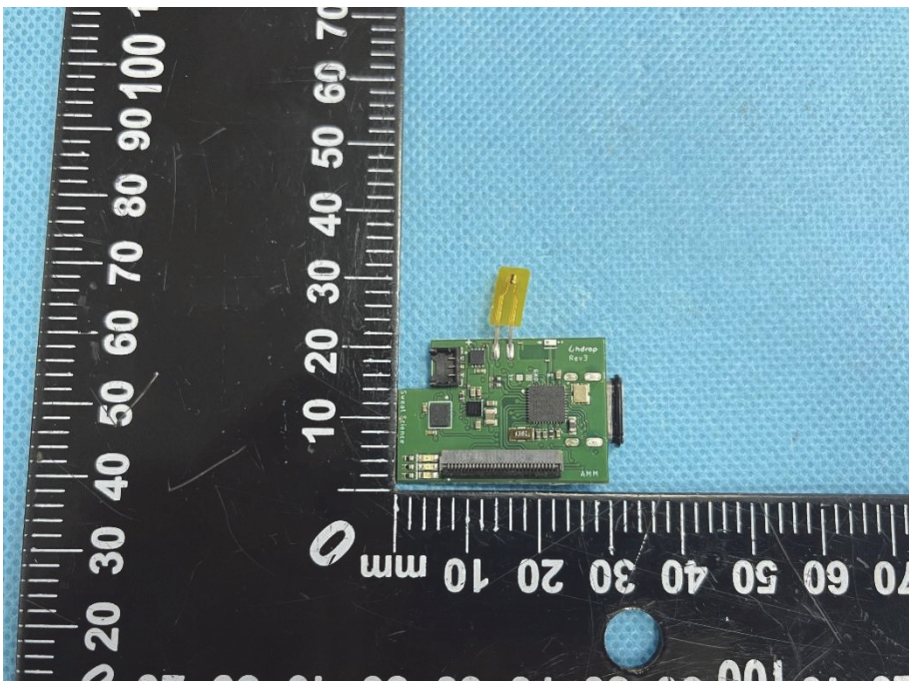

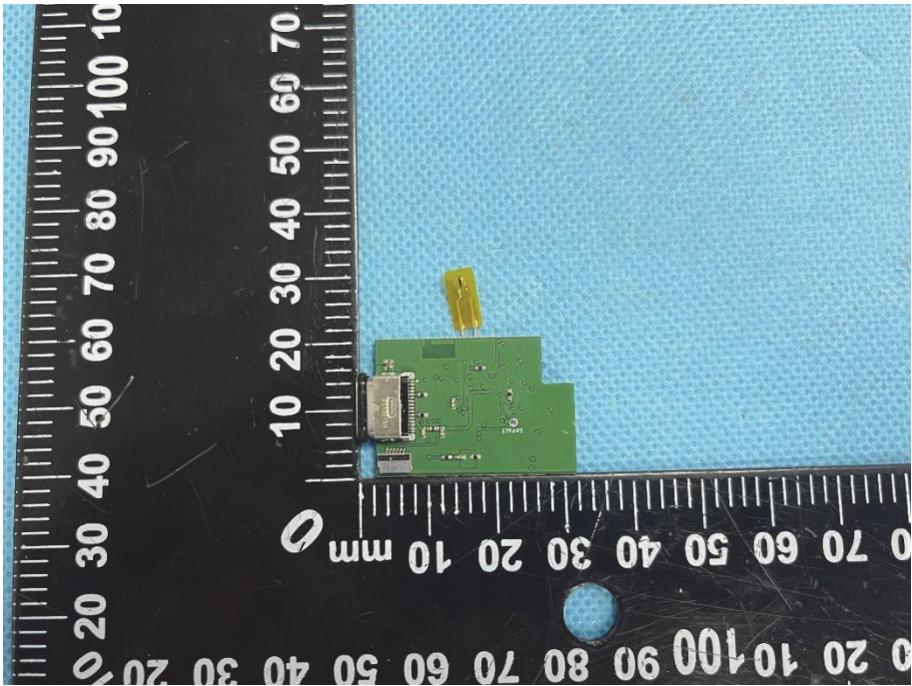

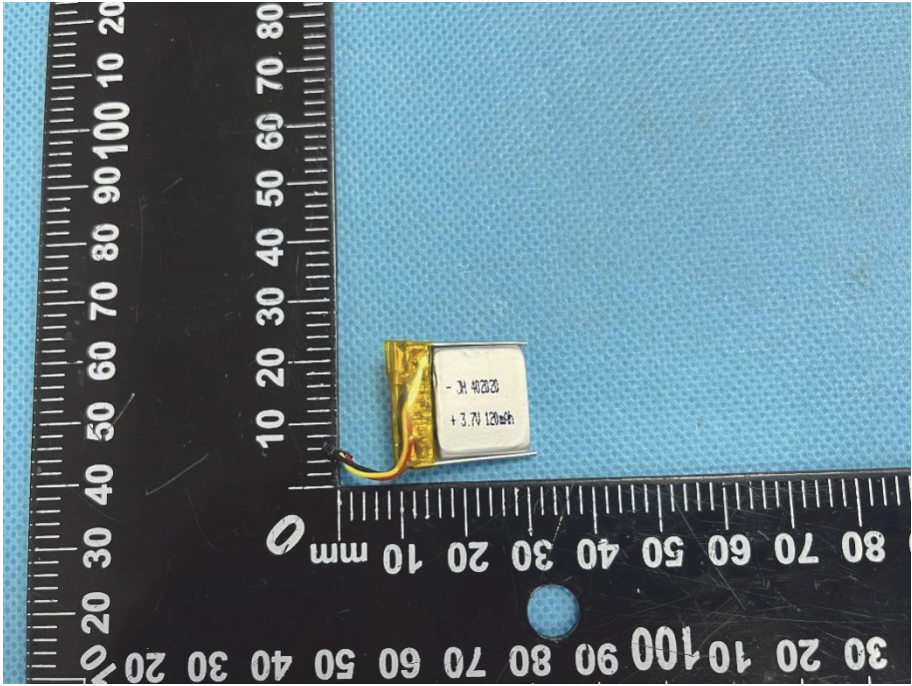

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing a small green printed circuit board (PCB) mounted inside a white plastic housing. The housing is open, revealing the board. A black ruler with white markings is placed below the assembly for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The PCB is approximately 30 mm long and 15 mm wide. The background is a blue textured surface.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the green PCB component. A yellow component is soldered to the board. A black ruler with white markings is placed below the component for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is approximately 15 mm long and 10 mm wide. The background is a blue textured surface.

<p>Solder Board-Component View 2</p>	 A photograph of a small green printed circuit board (PCB) component. The component is rectangular with a gold-plated edge connector on the left side. A small yellow component is attached to the top of the board. The component is placed on a black ruler with white markings for millimeters. The ruler shows the component is approximately 25 mm wide and 15 mm high. The background is a blue textured surface.
<p>Solder Board-Component View 3</p>	 A photograph of a small white rectangular component, likely a battery or capacitor, with gold-plated leads. The component has a white label with black text that reads "442021 147.1 + 3.7V 12mAh". The component is placed on a black ruler with white markings for millimeters. The ruler shows the component is approximately 25 mm wide and 10 mm high. The background is a blue textured surface.
