

# **USB-C Wireless Charger**

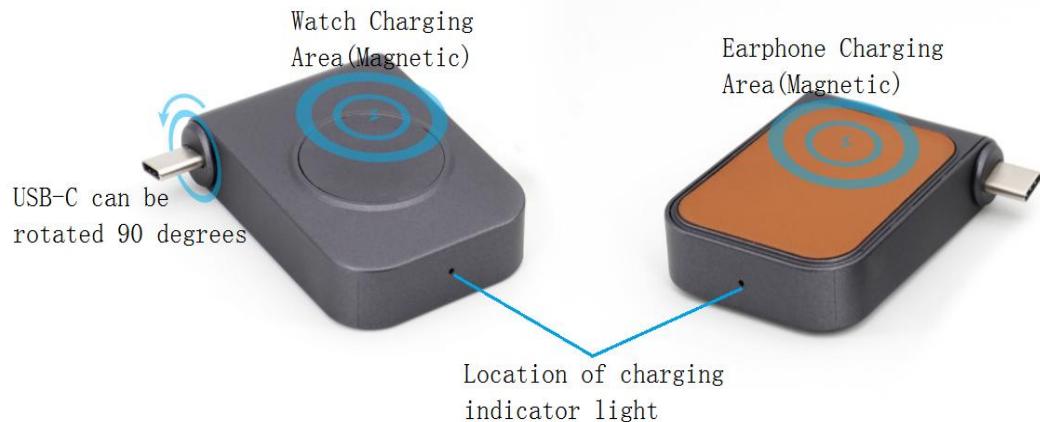

## **User Manual**

## Product Introduction

---

The product is a wireless charging pad, preferred smart chip , and supports apple smart watchs, earphones. Achieve high efficiency, stable performance, put it on and charge, easily enjoy wireless charging technology life.

## Specification

---

Input: 5V2A

Output: 5W(Earphone) 2.5W(Smart watch)

Conversion Efficiency: <75%

Working frequency: 115~205KHz (Earphone)/300~350KHz (Smart watch)

Materials: PC

Size: 65\*56\*16mm

Weight: 35g

Color: Black/White

Transmission Distance: 2~6mm

## Precautions

---

1. Do not place metal debris or magnetic stripe card to the charging panel, the charger may be damaged.
2. If the overheating after stop charging, remove the charging device to be cooled, and then try to re-charge.

## Safety Tips

---

1. Do not disassemble the product or in fire, water, and avoid causing a short circuit.
2. Do not place the product in extremely hot, humid or corrosive environments, to avoid damage to the product.
3. Do not give children to play, in order to avoid unnecessary accidents.

## FAQ and Solution

---

1. My device is hot while charging, is it normal?

--If you don't charge your device in a good charging area, the heat dissipation may not good and it will cause your watch or earphone hot during charging. product has overheat protection function.

2. Why it charges slowly than my original adapter came with the mobile device?

--The wireless charging current size allowed by the earphone/watch itself or external receiver coil is different.

--When the earphone/watch is charging, the standby power consumption is large, so it is recommended to reduce the earphone/watch standby program.

3. Is radiation from wireless charging harmful to one's health?

--The product wireless charger emits non-ionizing radiation which is not harmful to humans.

## **Warranty**

---

We provide all our customers 12 months warranty from the date of purchase.

### **FCC Warning:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential

installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
