

Declaration on model difference

We, Justsmart Innovation Inc., the undersigned hereby confirm that these models are identical, and all models have the same RF module and Antenna. All PCB boards are the same except the model names, GS1 Max is the high configuration, GS1 Plus is the medium configuration, and GS1 Basic is the low configuration.

They also have different lamp board powers, 48W for GS1 Max, 36W for GS1 Plus and 30W for GS1 Basic. GS1 Max has the functions of automatic water adding, automatic fertilization and automatic heating. GS1 Plus has automatic water and fertilizer adding, no automatic heating, GS1 Basic does not have automatic water adding, automatic fertilization and automatic heating functions. But they all have the same RF capability, as shown below:

| Function | High configuration | In the configuration | Low configuration |
|-------------------------|--------------------|----------------------|-------------------|
| Model No. | GS1 Max | GS1 Plus | GS1 Basic |
| The lamp panel power | 48W | 36W | 30W |
| Automatic water | yes | yes | No |
| Automatic fertilization | yes | yes | No |
| Automatic heating | yes | No | No |
| WIFI | yes | yes | yes |

The test model is High configuration GS1 Max.

|---------------------|------------------------------|
| Product name | Indoor Garden |
| Model No. | GS1 Max, GS1 Plus, GS1 Basic |
| Trade name | N/A |
| FCC ID | 2A8KS-GS1 |
| INPUT | 100-240V~50/60Hz 1.5A |
