

PICKFUN AI PET SHORT VIDEO MAKER

USER MANUAL

Dear pets parents, please read this user manual carefully before using the product and keep it properly.

I. Product info

Pickfun AI Pet Short Video Maker, referred to as "Pickfun", is a warm smart creative pets short video maker with thinking. It can automatically track pets and edits into a short video to record time of your pets.

1. Structure

Product structure wire frame diagram

2.Packing list

Pickfun AI Pet Short Video Maker x 1, Power Adapter x 1, Card Picking Pin x1, User Manual x1

II. Instructions

1. Download APP

Scan the QR code in the outer packaging, at the bottom of the device or the QR code below, and download the Pickfun APP (or search for "Pickfun" in app stores to download and install directly).

2. Power on

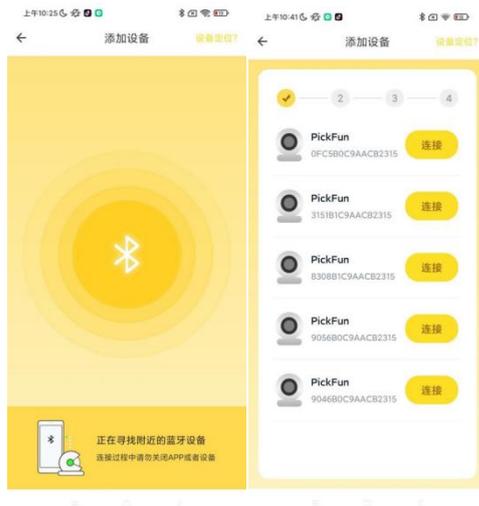

Please power on the Pickfun AI Pet Short Video Maker, and use the attached power adapter that comes with it to power on (Note: Do not use this special adapter to power other electronic devices such as mobile phones in case of damage). When the indicator light turns orange, it indicates that the power is working, and the device starts self-check and rotation. After the self-check, the indicator turns orange marquee, and the device enters the waiting state.

3. Bind the device/configure the network

(1)After registering and logging in to the Pickfun APP ID, click "+" under the "Device" menu:

- Method 1: Select "Scan" and scan the QR code at the bottom of the device. (Keep the Bluetooth and location permission of the mobile phone stay activated and connected)
- Method 2: Select "Find Device", activate Bluetooth in the mobile phone, and the app will start to search for the surrounding devices. According to the serial number at the bottom of the device, click "Connect" to connect your device; (If the Android phone cannot search for the device for a long time, please confirm whether the location permission of your mobile phone is allowed, click "Device Location?", enter the phone settings page, and enable the location permission)

(1) Device initialization: Insert the attached card pin into the reset hole at the bottom of the device. After the device makes a "beep" sound, the initialization is successful.

Click [Initialization Successful] to enter the next step;

(2) Device network configuration: Enter the home WiFi name and password, and click Next (Pickfun currently only supports 2.4GHz WiFi connection)

(1) Successful connection: The device voice prompts the network configuration is successful, and the APP interface shows the device is successfully connected, then you can click "Start Experience" to skip to the real-time screen of the device; at this time, the indicator light of the device changes from a pink flash to a constant white light.

4. Status indicator

- A single orange light always on: the device is powered on successfully, and the

self-check is in progress

- Orange marquee light: The device is not connected to the network
- Pink and purple breathing light: device is in the process of network configuration
- The upper white light always on: the device is working normally, searching and photographing pets
- The lower white light always on: the real-time screen is working
- The upper white light + orange light always on: the device is in a disconnected and offline working state
- Lights off and lid closed: the device is in sleep

III. Product functions

1. Intelligently generate pet short videos

Pickfun AI pet short video maker, making use of AI algorithm technology, will automatically shoot and edit pet short videos for pet parents, recording wonderful moments of cute pets without manual efforts throughout the process,

2. View the real-time screen

After the device is bound successfully, you can click the connected Pickfun device in the APP to view the real-time screen . After entering the real-time screen, you can adjust the PTZ direction of the device through the operation interface of the app, and you can also make remote calls, etc.

3.Device sharing

You can share your Pickfun device with family members or friends. After sharing, you can see the video automatically produced by the device, and you can view the real-time screen, which supports up to 4 people watching at the same time. Let's feel the joy of raising pets together.

4. Privacy Protection

Pickfun tracks and detects pets only; the device will automatically sleep at night, the lens will turn downward for physical shielding during sleep, and the helmet will automatically cover down for secondary physical shielding, so you don't need to worry about privacy leakage.

IV. Frequently Asked Questions

1.How does the device work?

After the device is powered on and the network configuration completed, Pickfun will immediately enter the shooting mode, and will automatically shoot according to the pet's environment, edit and push the finished short video.

2.Recommended Pickfun placement

1) In order to ensure short video quality, please avoid the clutter in front of the Pickfun device and maintain a clear vision.

2) Please ensure the brightness of the environment. It is recommended that you open the curtains when you go to work during the day, and keep the room where the pet moves bright.

3) In order to output a better video effect, it is recommended to place the Pickfun device at a position less than 1 meter above the ground (such as a coffee table, TV cabinet, etc.).

4) In case your pet knocks down the device, you can select it to sleep in the APP to prevent the device from continuous idling.

3. How does Pickfun save videos?

Currently Pickfun does not support TF card expansion storage, but only cloud storage of videos. Pickfun gives users 500M cloud storage capacity for free. The first batch of users will be given an extra 5G cloud storage space, valid for half a year.

4. The APP shows that the device is offline, what should I do?

1) When the power is on, please check the device status according to the indicator light;

2) Enter the APP device management menu and check whether the device is being upgraded (when the device is in upgrade, it will be restarted offline briefly)

3) After the device is powered off and restarted, observe the device status;

4) If after the above operations the issue still cannot be solved, please contact us;

V. Specifications

Specifications	
Product name	Pickfun AI pet short video maker
Product model	Smart P1
Video resolution	1080P
Video encoding	H.264
Wireless connection	802.11n 150Mbps WiFi + Bluetooth BLE5.0

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions,

may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC' s RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
