Wireless transmitter can be used for online voice chat, listen music, and interactive games receiving distance in 10 meters

- 041 and above version support voice calls
- frequency: 2402 MHZ to 2480 MHZ ISM Band
- microphone sensitivity: - 45 db (0 db = 1 v/Pa, 1 kh2)
- talk time: above 15 hours
- standby time: 200 hours
- charging voltage: 5 v
- charging current: 95 ma
- harging time: less than 3 hours
- product weight: 14 g
- not suitable to use the charger more than 2A for charging
- environmental temperature: to ensure the storage capacity and life of battery, please try to keep the battery temperature between 15 °C to 25 °C
- standard accessory: USB charging line, user manual
- battery type: built-in rechargeable lithium batteries
- wear mode: ear hanging
- To guarantee the transportation safety of bluetooth headset, factory setting should keep the battery capacity at about 30-60%
- please fully charged for the first time use, repeatedly more than three times can achieve the best results

Due to continuous upgrade of product, if there is any discrepancy in some functions, Please subject to the object and reserve the right without further notice

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
