Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p><b>FCC Statement:</b> This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:          ---Reorient or relocate the receiving antenna.          ---Increase the separation between the equipment and receiver          ---Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.          ---Consult the dealer or an experienced radio/TV technician for help.</p>
Version: V5.2	Battery capacity: 480mAh																
Working time: 50~80 hours	Charging time: ~1 hours																
Working distance: 15-25m	Charging power: 5V-450mA																
Horn: Ø8mm	Working voltage: 3.1~4.2V																
Impedance ohmic value: 32Ω	Frequency: 2.4-2.480GHZ																
Working current: 5~15mA	Standby time: ~365day																
Working environment: -10~60°C
