DEKRA Testing and Certification, S.A.U.
Parque Tecnológico de Andalucía
C/ Severo Ochoa 2 & 6
29590 Campanillas
Málaga, España

FCC ID: 2A93W-GWL-MD-PIR

To whom it may concern:

During the testing to pursue the FCC grantee for this device, 2A93W-GWL-MD-PIR, we initially tested with software version **2.22.6**. However, during the testing procedure, we identified improvement areas and upgraded the software version to **2.22.7**

We detail here the change history of the device during the testing phase:

SOFTWARE

- 2.22.7 changes
 - Clock frequency of the external crystal of the EFR32FG12 chip updated (from 38.4MHz to 39MHz).
 - Country Codes added; US, AR, BR, CL, and PE.

Hereby,

we declare that the improvement areas identified and subsequent changes in the software did not impact the WLAN 2.4 Ghz testing that was carried out with the original version (2.22.6), and therefore, the test was not repeated considering the test report number 23A0395R-RFUSV01S-A is representative of the product.

Only the following testing has been repeated and performed with the software version 2.22.7:

- SRD 915.5 – 925.5 Mhz RF testing
- Simultaneously transmission SRD and WLAN testing
- EMC testing

Sincerely,
