5. It will take 2 hours to fully charge the receiver, which can be used for about 10 days. It will take 2 hours to fully charge the transmitter, which can be used for 90 days.

General Training Tips

The following tips will show you how to get the best performance out of your Dog Training Collar.

1. Training one dog each time is recommended.
2. During the first initial training sessions, keep the dog in a familiar outdoor environment. Training in a place that the dog is not familiar with may make the dog become distracted.
3. For basic obedience training, vibration is more useful.
4. During the training, look for any positive behavioral changes in the dog and do not forget to encourage in time.
5. When you put on the collar, be careful not to tighten it too tightly around your neck, but make sure it is still tight enough. For optimal function, it is essential to check that the conductor are in contact with your dog's skin. If your dog has long hair, you will probably need to trim his hair slightly so that the contact area is well adhered to the skin of your dog.
6. It is important to start your collar with the lowest level to avoid shocking your dog. You can start by putting the collar on your dog without turning it on so that he can get used to wearing it and that he understands that the collar is not there to disturb him.

WARNING

Do not use this product for your aggressive dog, or if your dog is prone to aggressive behavior. Aggressive dogs may cause damage to the people or things around. If you are unsure whether this product is appropriate for your dog, please consult your veterinarian or certified trainer.

Important Information

1. Place the collar on your dog at the beginning without starting to allow your dog to adapt.
2. Keep one finger between the dog's neck and collar to avoid strangling the dog's neck when running, moving or shaking.
3. Avoid wearing the collar on the dog for more than 12 hours per day. If possible, reposition the collar every 1 to 2 hours.
4. Never connect the dog rope to the collar, it will cause excessive pressure on the contact area.
5. Wash the neck area of your dog and the contact area of the collar weekly with a damp cloth.
6. Examine the contact area of dog daily, lest rash or sore appears.
These cautions will help to keep your pet safe and comfortable.

FAQ

Q1: How old does my pet have to be before using Training Collar?

A1: Your pet should be able to recognize basic obedience commands such as "Sit" or "Stay" This product may be too large for pets under 10 pounds.

Q2: Why does the training collar not work?

A2: First make sure the transmitter is unlocked then adjust the appropriate level of Vibration, Static Shock and Beep based on your dog's characteristics such as character, type, age, weight, and so on.

Q3: Which part of the dog's body can put the catch?

A3: Hello, under the throat.

Q4: When you close the remote control, why does the training collar still work?

A4: Hello, the remote can not close the training collar, it does not work like your TV remote. Please close the training collar via receiver power button.

Q5: Can I use Training Collar with more than one pet?

A5: Yes, you can simply add one more receiver collar to the system.

Q6: Will I get exactly 1950 ft of range with the Training Collar?

A6: The effective range of the Training Collar means the straight-line distance between Remote Control and Receiver Collar without obstacles in between. Range may be variable according to terrain, weather, vegetation, battery capability as well as the transmission from other radio devices.

Q7: What do I do if my pet's neck becomes red and irritated?

A7: Discontinue to use the product for a few days. If the condition persists beyond 48 hours, consult your veterinarian for help. Once the skin recovers, check the skin condition of your pet frequently.

Q8: How long is the lifetime of the lithium battery?

A8: Our Lithium battery can charge 2000 times for Remote Control and Receiver Collar.

Q9: How long can I remove the Receiver Collar from my dog?

A9: The Collar is not designed to be worn constantly. We recommend the Collar not be worn for more than 12 hour of every 24-hour period.

Q10: How long should I process my training session for my pet?

A10: Training sessions should be kept positive and short, it is better for about 10-15 minutes each time.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The product is a portable device and meets the exposure assessment requirements for portable devices.
