ATTENTION

- Use A USB output device with stable supply at least DC5V0.5 A.
- Please do not charge in direct sunlight or in a high temperature environment over 50 degrees.
- Please do not cover the fuselage with cloth during charging to avoid fire.
- If there is a burning odor or smoke during charging, remove the USB cable immediately.
- This product is simple waterproof specification, please do not use in heavy rain.
- Please do not look directly into the LED light, and do not shine into the eyes of humans and animals.
- When the product is stained with oil or grease, please wipe it with a soft cloth.
- In case of obvious stains, use diluted neutral detergent to wipe and then dry with a cloth, leaving no moisture.
- If you do not use it for a long time (more than 6 months), please fully charge it before use.
- In order to maintain storage capacity, please fully charge once every 3 months.
- Please keep away from high temperature and humidity.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
