### What's in the box?

Light Strip	1
Smart RGB Controller	1
Power Adapter	1
Fixing clips & screws	10
User Manual	1

### Specification

Light strip Length	5m/16ft per roll
LED Color	5050RGB+2835CW
Color Temperature	2700k-6500k
Power Supply output voltage	DC 24V
DC power size	5.5x2.1mm
Maximum current	2A

### Installation

- Clean the surface to ensure it's dustless and dry
- Cut the light strip(Optional) Cut the light strip according to your need

**If the light strip was cut, it cannot be extended anymore**

- Take off the protective film on the tape, stick the light strip on and press over it firmly.
- Place the light strip on the clips when it is necessary. There are 2 ways for the fixing clips:
  - Use the 3M stickers directly
  - Reinforce clips and screws provided

- Connect the light strip with the controller
- Connect the power adapter with the controller, then power on

### Control the light

- Control via the controller
  - Strip light connector
  - Button
  - WIFI Indicator
  - DC power connector

Button	Function
Press the button	ON/OFF
Long press the button for 5s or above	Reset factory settings

Indicator	Status
Flashes slowly	Ready for WIFI connection
Flashes rapidly	Connecting to WIFI
Solid on	Connected successfully
Flashes irregularly	OTA Online

- Reset the light manually:
  - Long press the button for 5s or above.
  - Remove the device from the APP manually. Tap in the "Smart light strip" and remove it.
  - Turn the device ON-OFF-ON-OFF-ON until the light blinks or breathes.

### 3. Control via the APP (The sync mode can be only controlled via APP)

- Download Lytmí APP
  - Android:
  - iOS:
- Make sure your WIFI is under 2.4Ghz; Turn on Bluetooth and GPS/location on your phone.
- On the APP, register and log in. The APP will detect the "Smart Light Strip" automatically. Tap and add it.

- Tap Setting -> Synchronize to customize the sync mode (Neo HDMI2.0 sync box standard edition required)
- Tap Scene to select/change the light mode and enjoy!

### Voice Control

Support Voice Assistant like: Alexa, Google Assistant and Smart Things.

### By "Lytmí Station" Desktop APP

Download the software on our official website: <https://ilytmi.com/> (Only supports WIN10 above)

### Notice

- The sync mode requires Neo HDMI2.0 sync box standard edition required or PC Screen Strip Light; It also requires HDMI Sync Box or Lytmí Station Desktop APP in the same WIFI router. (The HDMI Sync Box should be on, otherwise, it cannot be synced)
- The light strip can be extended another 15 meters. (Maximum length of 20 meters in total)
- If the light strip was cut, it cannot be extended anymore.

### Troubleshooting

- Cannot connect with Lytmí APP
  - Make sure the light is well connected and powered on.
  - Make sure the Bluetooth, GPS is on and your WIFI is under 2.4Ghz.
  - Make sure the distance between the controller and the phone less than 1 meter while connecting.
  - Re-power on the strip and re-turn the Bluetooth in your phone to try again.
- Cannot use the sync mode.
 

Please make sure you have Neo HDMI2.0 sync box standard edition required or Lytmí Station Desktop APP for the sync mode.

  - Pull out each connective part and re connect them.
  - Tap ON/OFF button on the controller or APP to exclude the light strips issue.

If you have any problem about the item or something is unfounded in the package, feel free to contact us.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
