

PURE SMART™

TruColor™

### What is TruColor™?

Pure Smart TruColor™ technology uses five-channels of tunable LEDs, composed of RGBTW red, blue, green, warm white, and cool white.

With our proprietary color mixing we produce one of the widest, most accurate spectrum available from 1500K-6500K, giving our customers access to the warm glow of the sunset (1500K-2400K golden hour) to the white light of the mid-day sun (5700K) and beyond. TruColor LED's achieve an average CRI-Color Rendering Index of 93+ and a Duv of +/-0.004 in relation to the blackbody curve at any point on the spectrum of tunable white CCT.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**RF Exposure Information**  
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
