

Refer to the inquiry tracking number 765549 as below showed, FCC ID and label information may go in the manual without submitting KDB inquiry.

This product is too small to put the FCC ID and label on the earbuds, so the FCC ID and label information is placed on the manual. Please refer to below picture.

Inquiry on 05/16/2017 :
Inquiry:

Dear Sir/Madam,

This is Benson from SGS test lab. I got a project to apply FCC certification. The sample contains left earphone, right earphone and charge docking. The two earphones has the same BT module (BT 4.1+EDR), but the PCB layout is difference.

My questions are:

1. Can I use one ID number for the two earphones to issue the one Cer.?
2. Can I affix the label in the bottom of the docking or user manual since the size is too small and surface is bend surface, not flat, It's hard to affix the label on the surface of the earphone.(For the Size and photo, Pls. find the attached photo with PDF format)
3. If FCC can accept affix the label in the docking or user manual pls. ignore this question. Thanks!

If FCC can accept the one ID
No. but don't accept locate the label in the bottom of the docking or user manual, may I locate the label in the left earphone? Since the left earphone is the main device.

FCC response on 05/17/2017

If the circuit boards are identical, one FCC identifier is used. If the circuit boards are not identical two FCC identifiers are required. FCC identifiers and label information may go in the manual without submitting KDB inquiry
