SOME DOS AND DON'TS ON THE SAFE USE OF EQUIPMENT

This equipment has been designed and manufactured to meet international safety standards but, like any electrical equipment, care must be taken if you are to obtain the best results and safety is to be assured.

- read the operating instructions before you attempt to use the equipment. ensure that all electrical connections (including the mains plug, extension leads and inter-connections between the pieces of equipment) are properly made and
- in accordance with the manufacturer's instructions. Switch off and withdraw the mains plug before making or changing connections. consult your dealer if you are ever in doubt about the installation, operation of safety of your equipment. be careful with glass panels or doors on the equipment. route the mains lead so that it is not likely to be walked on, crushed, chafed, or
- DON'T remove any fixed cover as this may expose dangerous voltages. DON'T obstruct the ventilation openings of the equipment with items such as

subjected to excessive wear and tear or heat.

- ewspapers, tablecloths, curtains, etc. Overheating will cause damage and shorten the life of the equipment. DON'T allow electrical equipment to be exposed to dripping or splashing, or objects
- filled with liquids, such as vases. DON'T place hot objects or naked flame sources such as lighted candles or nightlights on, or close, to equipment. High temperatures can melt plastic and lead to fires.
- use makeshift stands and NEVER fix legs with wooden screws. To ensure complete safety always fit the manufacturer's approved stand or legs with the fixings provided and according to the instructions.
- use equipment such as personal stereos or radios that will distract you from the $\,$ requirements of traffic safety. DON'T listen to headphones at high volume, as such use can permanently damage your
- DON'T leave equipment switched on when it is unattended unless it is specifically stated that is designed for unattended operation or has a stand-by mode. Switch off using the ON/OFF switch on the equipment or at the mains socket, and make sure that your family knows how to do this. Special arrangements may need to be made for infirm or handicapped people. DON'T continue to operate the equipment if you are in any doubt about it working
- normally, or if it is damaged in any way switch off, remove the mains plug from the mains socket and consult your dealer.

ABOVE ALL NEVER let anyone especially children push anything into holes, slots or any other opening in the equipment – this could result in a fatal electric shock. NEVER guess or take chances with electrical equipment of any kind. It is better to
