

FCC ID: 2AA5HAP004

Device is in portable RF exposure category (d<20cm from body).

Peak Conducted Output Power = 2.03dBm = 1.6mW

Separation distance = 5mm

Frequency = 2.48GHz

The 1-g and 10-g SAR test exclusion thresholds for 100 MHz to 6 GHz at test separation distances  $\leq 50$  mm are determined by:

**$[(\text{max. power of channel, including tune-up tolerance, mW})/(\text{min. test separation distance, mm})] \cdot [v_f(\text{GHz})] \leq 3.0$**  for 1-g SAR

**$0.5 \leq 3.0$**

Therefore device complies with FCC RF radiation exposure limits for a portable device without SAR evaluation.
