Wi-Fi Network Settings

As the Wi-Fi connection is important to enable various functions of this device, please firstly configure the Wi-Fi network for your device.

1. Click the Icon  → **Settings** → **Wireless and Network**.
2. Please turn **ON Wi-Fi**.

The device will automatically search all available **Wi-Fi** networks. If the Icon  appears, the User shall correctly input the password before he conducts Wi-Fi connection.

3. Click the **Wi-Fi** Network you want → if necessary, please correctly input the password

→ click **Connect**, and the Icon  will appear on the Desktop when the Wi-Fi network has been successfully connected.

4. Click the Icon  and go back to the Desktop.

☆ *If the Wi-Fi Network has been hidden, your device will not automatically search it out. You shall click **Add Wi-Fi Network**, and then input relevant information to add the Wi-Fi Network.*

3G Network Settings

1. When you want to connect your device with the 3G network, you shall firstly select the correct 3G network card suitable to your device because this device only supports external USB 3G Network Card. Please consult the Supplier for suitable 3G Network Card model.
2. When the SIM card has been well installed, please connect the 3G network card with the HOST USB port by means of the USB OTG connection cable.

3. When the 3G Network card has been connected, click the Icon  Settings → **Wireless and Network** → **More** → **Mobile Network**, and then conduct 3G Network Settings.
4. The Route for enabling the Mobile Network is as follow: Check **Enabled Data Traffic** → **Data Roaming** and select the APN; then click **Menu** to select an available network. Finally, you can surf the Internet by means of the 3G Network.
5. Usually, the device can directly select and use the available 3G Network, but the User shall create a new APN and to conduct relevant network settings for some special devices in order to enjoy Internet service.

For example, China Unicom 3G Network Settings are as follow:

Name: 3GWAP / **APN:**3gnet / **Agent:** Not set/ **Port:** 80 / **User Name:** Not set/ **Password:** Not set/
Server: Not set/ **MMSC:** Not set / **MMS Proxy:** Not set/ **MMS Port:** Not set / **MCC:**460/
MNC:01/ **Authentication Type:** Not set/ **APN Type:** Not set/ **APN Protocol:** Not set

Upon the completion of settings, the device can successfully connect to the 3G Network, and the Icon  will appear on the Screen.

The Icon in gray is to search the available network, and the Icon in Blue means that the device has been successfully connected with the 3G Network. As shown in the Diagram , the device is conducting data transmission.

Usage of the Extended Memory

1.Usage of the U Disk

Please insert the U Disk to the OTG Port → Then insert the OTG Connection Cable into the HOST USB Port. When the U Disk has been well connected, you can start to use it.

- ☆ Please do not frequently insert and pull the U Disk; otherwise, the U Disk and even the Device may be damaged.

2.Usage of the SD Card

☆ *This device can support 32GB Memory Card at most.*

Please insert the memory card into the slot, and push it with your finger. At that moment, the main screen will appear **Preparing SD Card**, and finally the TF Card will be well prepared for your service.

Remove the SD Card

Please firstly close all programs or files in the SD card. Click the Icon  → **Storage** → **SD Card** → **Unload the SD Card**. Gently push the SD Card, and it will be ejected. Finally, you can take it out.

- ☆ Please do not quickly repeat inserting and pulling the SD Card; otherwise, the SD Card may be damaged.
- ☆ Memory Card of famous brand is suggested so as to avoid incompatibility with the device.

Download/Unload Application Programs

☆ It is possible for the User to search interesting and free Android application programs in great variety on the Internet. You shall start the Browser and try to search **Android Application Programs**.

It is convenient for you to install your purchased or downloaded Android application

programs by means of the File Manager 

1. Copy the .apk files you want to the SD Card or USB Storage device → Insert the SD Card into this device, or connect it with this device by means of the U Disk.

2. Click the **File Manager** Icon 

3. Click the Icon  or the Icon  to find the .apk files or folder.
4. Select one .apk file → **Install**. When such application program has been installed, its Icon will display itself among other application programs.
5. Click and directly run relevant program; or click and go back to the File Explorer.

Install Application Programs through Online Downloading

It is possible for you to download Android application programs from the Internet or other Android stores, and to quickly install them into your device.

1. Click the **Browser** Icon  to connect with the Internet.
2. Input the URL and click the download link of the application program you want.
3. Upon the completion of downloading, please press the downloaded file (downloading records) for a while → Click **OPEN** → **Install**.

Unload Application Programs

You can unload the Android program very quickly.

1. Click **MENU** → **Settings** → **Application Programs** → **Application Program Management**.
2. Click the Application Program you want to unload → **Unload**.
3. Click **CONFIRM** and finish unloading.

Connect to PC

1. When the Tablet PC has been connected with your PC, the tablet PC can serve as a portable storage device. Please use the USB cable to connect it to your PC with one end to the USB OTG port and another end to the USB port of PC;

2. With successful connection, the Icon  will appear on the screen of the Tablet PC; please click the Icon , and then select **Turn on the USB Storage**. After that, it is possible for the User to conduct Data Storage between your PC and the Tablet PC, as shown below:

Charging

This device can be charged by means of the Power Adapter with one end connecting to the Power Supply and the other end to the supply hub of this device.

During the charging process, the Battery Icon will display itself as ; when this device has been fully charged, the Battery Icon will display 100%.

- Although you can use this device during charging process, the charging time will become longer.
- Use this device once a week at least.
- Please fully charge this device at regular intervals.
- Please do not keep this device powered off for quite a long time.

Precautions

Please pay special attention to the following notes for the sake of safety:

- Please do not expose this device to rain or humid environment.
- Please keep this device away from sunlight and heat sources.

- Please protect the Power Cable. When it has been connected with the power supply, please do not tread on it or place other objects above it. Please pay special attention to the joint of the Power Cable Connection Device.
- Please use the original power adapter to conduct charging for this device. Other chargers may cause damages to this device.
- Please do not disassemble the casing or repair this device by yourself.
- Please take good care of the Display Screen. Please use soft cloth to clean the fingerprint or dust on the screen rather than hard and rough cloth.
- **Pictures in this document are only for demonstration. Please refer to the actual situation.**

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
