Class A Commercial Product Justification

The Rothenberger RoScope i2000 (also sold as Virax mini-VISIOVAL) wireless video boroscope is specifically designed for industrial and plumbing applications; the unit will not be marketed to the general public. The normal distribution channel for the device is via the Rothenberger pipe-tool sales network throughout Europe which consists of specialty plumbing stores that serve trained and certified plumbers (the Virax device is sold in the same fashion at industrial supply stores in France). In the USA the Rothenberger RoScope i2000 device would be marketed by Rothenberger USA through Grainger / Ferguson industrial plumbing stores.

This unit is unique in that the industrial design, imager head configuration, and focal range are configured specifically to suit internal inspection of plumbing, HVAC, and etc ..., and will be sold with an MSRP of around \$1000.

Regards

Jeff Schober
