* ADHESIVE LOCATION *

This category is equipped with Qi wireless gaming features mouse pad.
 The top side of the mouse is for user's operation requiring to be flat surface so is not suitable to affix a label drawing.
 Meanwhile the bottom side of mouse is to increase the friction force of the mouse pad plus raised round granular rubber sheet so is not able stick the label as well.
 Therefore our approach is affix the label with FCC & IC id label to the EUT's USB Cable. (*this cable is not detachable)
 We will also place the FCC & IC ID number in the user's manual while selling.
