K65 PLUS WIRELESS
## 75% RGB MECHANICAL GAMING KEYBOARD
QUICK START GUIDE

GETTING TO KNOW YOUR KEYBOARD

A. WIRELESS ADAPTER
B. BATTERY DIAL
C. WIN/MAC SWITCH
D. 3-WAY MODE SWITCH
E. USB TYPE-C PORT

F. USB TYPE-C TO TYPE-A CABLE
G. USB TYPE-C TO TYPE-C CABLE
H. MULTI-PURPOSE INDICATOR
I. BACKLIGHT BUTTON

BEFORE FIRST USE

Charge the keyboard fully before first use by connecting the USB cable (F) to the keyboard USB Type-C port (E) and to an available USB 3.0 or better Type-A port on your computer or USB power adapter.

Windows PC®	Apple Mac®	Microsoft Xbox One® Microsoft Xbox Series X	S*	Sony PlayStation 4® Sony PlayStation 5®

*Keyboard is compatible out of the box. Visit www.corsair.com/xbox for more info.
**When Connecting to Sony PlayStation System.

MULTI-PURPOSE INDICATOR (H)

LED serves as an indicator for different scenarios such as:
- Status indications when device is turned on
- Indication when a connection is made (wired/2.4Ghz/BT)
- Macro recording sequences
- Displaying differences and functions

Sequence of indication when powered on:

- Status - White
- Mixed/Wireless - Amber
- BT pairing (when power ON) pairing is triggered in BT/link

CHARGING & BATTERY LIFE

Upon powering on the keyboard or using the charge battery life shortcut (Fn+ Enter   ) an indicator LED will denote current battery charge level.

NOTE:
1. All backlighting except indicator turns off when battery level is 20% or below.
2. Device turns off automatically when battery is below 3%.
3. Battery indicator only shows for 3 seconds and turns off after each status change.
4. Multi-purpose Indicator (H) will breathe battery status while charging and turns off when charging is complete.

BUTTON & SWITCHES

Button/Switch	Function	Notes
3-Way Mode Switch (D)	On - 2.4GHz Off Off BT	On-2.4GHz & BT: the keyboard remains in wireless mode even when a cable is plugged. (For charging). Off: Wired mode. 2.4GHz mode: Indicator (H) LED turns solid white 3 seconds if connected, pulsing white if not connected.
Win/Mac Switch (C)	Windows Mac OS	
Backlight Button (I)	On/Off Toggle	This button reduces functional mode when the screen is locked.

CONNECTING VIA BLUETOOTH WIRELESS

Exit PS4 Wireless can save up to three pairing info and can be switched via Fn key (see below; table for details).

Steps to connect to your host device:

1. Turn on Bluetooth function of your host device such as a phone or tablet. (Bluetooth 4.0 or higher)*
2. Flip to BT mode of the 3-way mode switch (D) at the rear of the keyboard, and it will be in pairing mode automatically.
3. Follow the pairing instructions on your host device to finish pairing.
4. Press ESC to cancel the pairing process, and enter the pairing info.
5. To store or toggle to a different BT profile, simply hold Fn and BLE (BLE1, BLE2, BLE3) for 3 seconds. Any existing pairing info will be erased when new pairing is triggered.

Shortcut	Function	Indicator (H)	Status
Fn + 1 (Hold)	Switch to Bluetooth host 1 pairing*	Solid, Blue (3 sec)	Connected
		Pulsing Blue or fading out after all sec	Disconnected
Fn + 2 (Hold)	Start Bluetooth host 2 pairing*	Rapidly blinking Blue (120 sec)	Pairing
Fn + 3 (Hold)	Switch to Bluetooth host 3 pairing*	Solid, Blue (3 sec)	Connected
		Pulsing Blue or fading out after all sec	Disconnected
Fn + 3 (Hold)	Start Bluetooth host 3 pairing*	Rapidly blinking Blue (120 sec)	Pairing

CONNECTING VIA USB WIRED

1. Connect the keyboard via USB cable to a USB 3.0 Type-A port or better.
2. The keyboard will automatically switch to USB wired mode when mode switch toggle to off.

CONNECTING TO SONY PLAYSTATION

The keyboard also has a special mode to support Sony PlayStation 4 and 5 via 2.4GHz wireless and USB wired modes that can be activated via shortcut.

Shortcut	Function	Indicator (H)
Fn + P (Hold for 5 sec)	Switch to PlayStation Mode	Blinks Blue 3 times over 5 seconds, then Solid Blue
Fn + L (Hold for 5 sec)	Switch back to standard mode	Pulse Blue 3 times

NOTE: Available functions may be limited depending on gaming console support and application.

SOFTWARE MODE

When iCUE is running, the keyboard operates in software mode and is controlled by iCUE. Download iCUE from corsair.com/downloads and install on a Windows PC or Apple Mac to connect all of your CORSAIR iCUE compatible products together in a single interface, giving you complete control of everything from lighting to powerful macros.

HARDWARE MODE

When iCUE is not running or the keyboard is connected to a device that does not support iCUE, the keyboard operates in hardware mode, which uses profiles and settings saved to the onboard storage.

FN SHORTCUTS LIGHTING INDICATOR

When pressing FN key, all lighting will momentarily turn off (OR except for

- Keys that have FN shortcut functions, including predefined ones and macros assigned by user, will have backlighting turned ON in white.
- Inside, from current FN shortcuts, indication (H) will also show current profile color.
- Exception cases: when adjusting lighting effect shortcuts such as Fn++1~6 or Fn+Fd16, override to show the lighting effect which keeps playing until either Fn is released or a different Fm combo is pressed.

MACRO RECORDING

Step 1: Hold Fn + M key to start recording, and indication (H) breathes red.

Step 2: Press any series of standard keys to begin recording, and indication (H) blinks red.

(One standard keyboard functions can be record can not specify or onboard functions like:

- Halts
- Backlighting effects
- Brightness
- Media
- Win Lock

Step 3: Press Fn + M key to stop recording, and indication (H) rapidly blinks red.

Step 4: Assign Macro keys by pressing any key; Fn + key, or it is either Fn FL/F/RCALT/SHIFT key + key.

- Macro were recorded. Pressing that key or combination saves the macro.
- If no keys were recorded. Pressing that key or combination clears any original macro or function saved.
- (Except cannot record over these keys or key combinations:
- Esc
- All existing predefined FN shortcut combinations

Indication (H) displays Win Lock status.

NOTE: Once a macro is recorded, it will be remembered even after device is shut down and turned back on, and will not change until users make any changes or enable factory reset.

SWAPPING KEYSWITCHES

The keyswitches can be removed and replaced with any variety or combination of CORSAIR MX RGB mechanical keyswitches. Other third-party mechanical keyswitches with 3-pin and 5-pin design may be compatible, but are not guaranteed to work due to physical differences.

- Push the 3-in-1 keyswitch/keycap puller (G) over the keycap, then lift to remove.

- Position the tips of the 3-in-1 keyswitch/keycap puller (G) under the keyswitch top, and bottom tabs, then press in and lift to remove.

- Align the new keyswitch to pins and make with the socket and opening.

- Carefully press the keyswitch in until it "clicks" into place. If you feel any resistance, remove and try again.

NOTE: Be sure to align the new keyswitch properly before insertion to prevent bent pins or damage.

FACTORY RESET

Press and hold Fn + Backlight button (I) for 5 seconds. Multi-purpose indicator (H) will blink RED for 5 seconds once reset is activated. The keyboard will turn on with factory defaults.

BATTERY REMOVAL INFORMATION

- Remove the 6 screws balancing the two underneath covers
- Remove the horizontal bottom/on a slide from the motherboard
- Remove the lower cover and battery assembly from the keyboard

- Remove the battery from Remover
- Recycle batteries according to local battery disposal rules
