**Subject: SAR Evaluation Exemption Compliance Information**

**FCC KDB 447498 D01v05 Clause 4.3.1.1 SAR test exemption criteria**

This device meets the FCC Rule Part 2.1093 and FCC KDB 447498 D01v05 Clause 4.3.1.1 SAR test exemption criteria at a separation distance of 25mm. Analysis for FCC portable use SAR Exemption is as follows:-

A test separation distance of 25 mm has been applied to the SAR test exclusion calculation.

Peak conducted = 16.08 dBm = 40.551 mW

$[ 40.551 \text{ mW} / 25\text{mm} ] * \text{SQRT} (2.412) = 2.52 < 3.0$

Thus for portable use, the SAR exclusion condition is satisfied and SAR evaluation is not required.

Yours sincerely,

Company Officer: Orrin West
