

Vantron Statement

About FCC and IC test to the VT-M2M-TC product which use the Intel WLAN module 62205ANHMW , at this time, on VT-M2M-TC sample unit, Vantron does not provide 802.11/a function, so now we can accept the FCC report has no test data for WLAN module which works at about 5GHz frequency. Vantron closes the function by software program.
