Subject: **Modular Approval Statement – licensed radio services transmitter module**
July 20th 2015
FCC ID: 2AAGMVZ120Q

To Whom It May Concern:

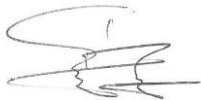

Pursuant to section III of FCC KDB 996369 D01 Module Equip Auth Guide v01r04, we herewith declare for our module.

(please provide explanation in related comment fields supporting the answer)

Modular approval requirement	
a. The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly;	Yes
<i>comment:</i>	
b. The module must have buffered modulation/data inputs to ensure that the device will comply with the applicable FCC rule parts regardless what type of input signal;	Yes
<i>comment:</i>	
c. The module must contain power supply regulation on the module;	Yes
<i>comment:</i>	
d. The module must demonstrate compliance in a stand-alone configuration;	Yes
<i>comment:</i>	
<ul style="list-style-type: none"> - <i>the module was tested while mounted on a test kit to provide for only power supply, data and antenna connection;</i> - <i>the test kit is documented as part of the filed exhibits;</i> - <i>the test kit does not impact the modules RF performance and test results</i> 	
e. The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements);	Yes

<i>comment: Engraved FCC ID</i>	
f. The module must comply with all specific FCC rule parts applicable to the transmitter including all the conditions to be provided to the installer in the integration instructions (like e.g. max. antenna gain);	Yes
<i>comment:</i>	
g. The module must comply with RF exposure requirements including related instructions to be provided to installers and host product users;	Yes
<i>comment:</i>	

Best Regards,
