Download the RUKUSfx[®] PRO STUDIO APP now for in-depth tutorials, advanced features, games, and so much more.

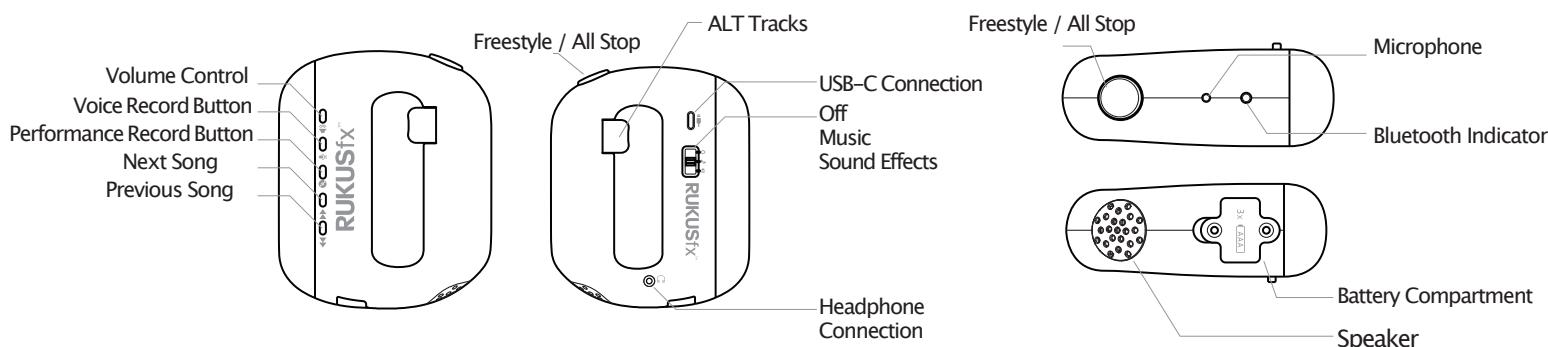

Watch all the tutorials in the RUKUSfx[®] PRO STUDIO APP or at www.rukusfx.com/tutorial

A few important things to know before getting started:

1) RUKUSfx[®] PRO is NOT rechargeable. It uses 3 AAA batteries that are either pre-installed in your unit or included in the package. Remember to change the batteries if you ever experience issues with RUKUSfx[®] PRO.
NOTE: The USB port does NOT charge your RUKUSfx[®] PRO.

2) Download the RUKUSfx[®] PRO STUDIO APP from the Apple or Android app stores. With the APP installed, you'll be able to access all the advanced (and fun) features RUKUSfx[®] PRO has to offer, including games, advanced DJ tools and much more!

INSERT BATTERIES

To insert the batteries, unscrew the battery door with a Phillips head screwdriver and insert 3 AAA batteries as shown on the inside of the battery door once removed. Be sure to insert the batteries as shown.

3 POSITION SWITCH: OFF/MUSIC/ SOUND EFFECTS

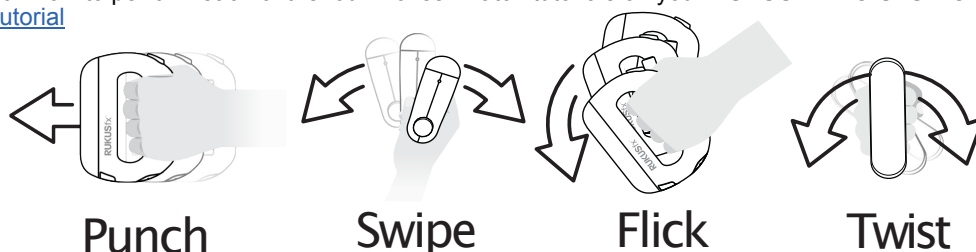

There is a 3 position switch – OFF/MUSIC/SOUND EFFECTS. Please refer to the image above. In the MUSIC position, you can access the songs and instruments library. In the SOUND EFFECTS position, you can access the sound effects library.

BUTTON FUNCTIONS

There are several buttons on your RUKUSfx[®] PRO. What they do is shown above. To further understand what they can do and how to use them, please watch the video tutorial in the RUKUSfx PRO STUDIO APP or at www.rukusfx.com/tutorial

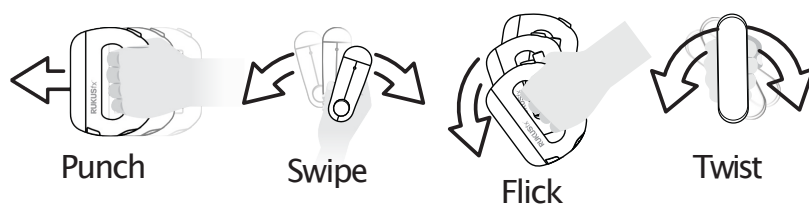

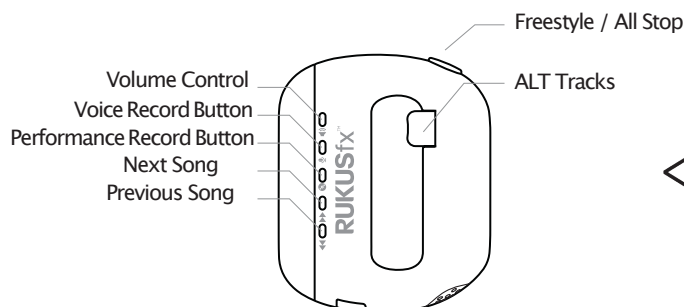

FOUR SIMPLE MOVES

The magic of RUKUSfx[®] PRO is that movement creates music and sound effects. HOW you move is super important for RUKUSfx[®] PRO to work the way it was designed. The four movements – PUNCH, SWIPE, FLICK, and TWIST-- are shown below. That said, it's really difficult to show precise movements on paper...you know, because paper doesn't move. So please watch the video tutorial for clear guidelines on how to perform each of the four moves. Watch tutorials on your RUKUSfx[®] PRO STUDIO APP or go to www.rukusfx.com/tutorial

CREATE A SONG

Now that you've watched the tutorials (wink wink), you're ready to create your first song! Flip the switch on the side of the device to the second position shown (Music Mode). Now, click the "Next Song" button indicated above and scroll through until you find a song that connects with your soul (or just until you find one you like).

Next, try the four movements shown above. It might take a few tries to get them down perfectly, but the most important thing to remember is that your movements need to be clean and deliberate. If your PUNCH is more FLICK-Y than PUNCH-Y, then there's a pretty good chance RUKUSfx[®] PRO will interpret that move as a FLICK.

ADVANCED FEATURES: ALT TRACKS

Now that you've become a master of movement, you can effortlessly create songs with four different tracks. When you're ready to take creating to the next level, just press and hold the ALT Tracks Button (Trigger button), perform one of the four basic moves - PUNCH, SWIPE, FLICK, or TWIST - and you'll instantly have access to four new tracks. When you release the ALT Tracks button, you'll be back to playing the first four tracks. After a few minutes, you'll be mixing all eight tracks and creating songs seamlessly.

ADVANCED FEATURES: FREESTYLE / ALL STOP

Press and hold the Freestyle button to move freely without triggering a new music or sfx track. Now you can dance around to your hearts content without interrupting the current music track that is playing. Let go of the button and get back to creating music/sfx with motion. Double-tap the Freestyle button to immediately stop all music and sfx.

ADVANCED FEATURES: RECORDING

To **RECORD YOUR PERFORMANCES**, select a song you would like to perform. Press the Performance Record button. You will hear three short beeps. As soon as you hear the last beep, start performing your song (using PUNCH, SWIPE, FLICK or TWIST). When you're done, press the Performance Record button again. You will see a RED light followed by a series of colored lights prompting you to save your recording to one of the four basic moves (PUNCH, SWIPE, FLICK, or TWIST). Your recording will be saved into that position and you'll be able to play it back whenever you want. NOTE: you must save your performance to one of the four moves before the lights stop flashing. Otherwise, your recording will not be saved. Repeat the above process to record up to 7 more performances (with and without pressing the ALT Tracks Button). To access your recorded performances at any time, double press the Performance Record Button and you will be instantly brought to your recorded performances. Then PUNCH, SWIPE, FLICK, or TWIST to hear them.

To **RECORD WITH MICROPHONE**, press the Microphone Record button. You will hear three short beeps. As soon as you hear the last beep, start talking into the mic. When you're finished, press the Microphone Record button again. You will see a RED light followed by a series of colored lights prompting you to save your recording using one of the four basic moves (PUNCH, SWIPE, FLICK, or TWIST). Your recording will be saved into that position and you'll be able to play it back whenever you want. NOTE: You must save your recording to one of the four moves before the lights stop flashing. Otherwise, your recording will not be saved. Repeat the above process to record up to 7 more mic recordings (with and without pressing the ALT Tracks Button). To access your mic recordings at any time, double press the Microphone Record button and you will be instantly brought to your mic recordings. Then PUNCH, SWIPE, FLICK, or TWIST to hear them.

ADVANCED FEATURES: RUKUSfx[®] PRO STUDIO APP

With RUKUSfx[®] PRO connected to the STUDIO APP you'll have so many advanced features to explore.

DJ Mixing Tools

CAUTION: Changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
