

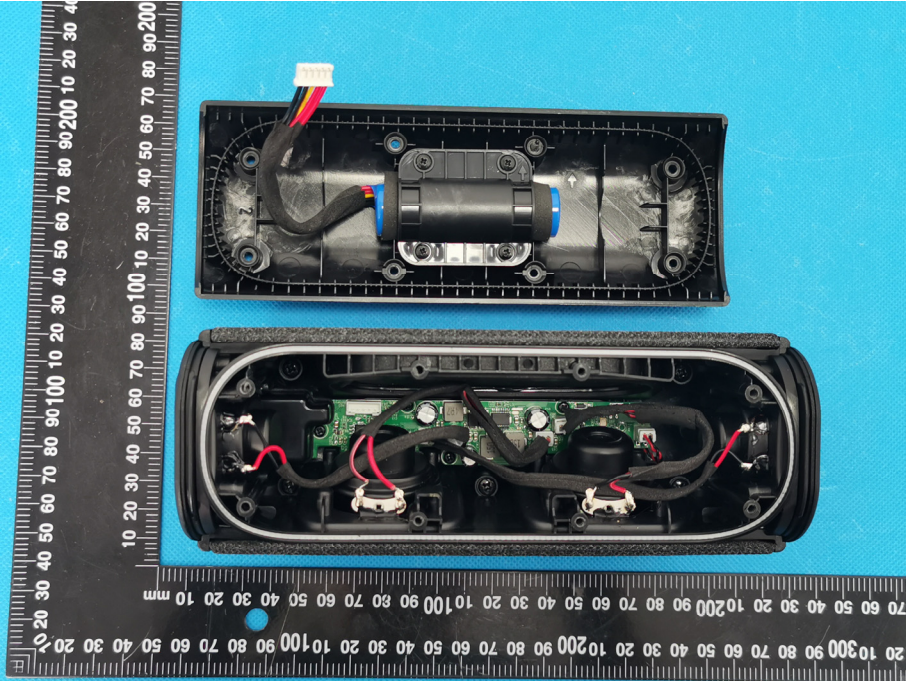

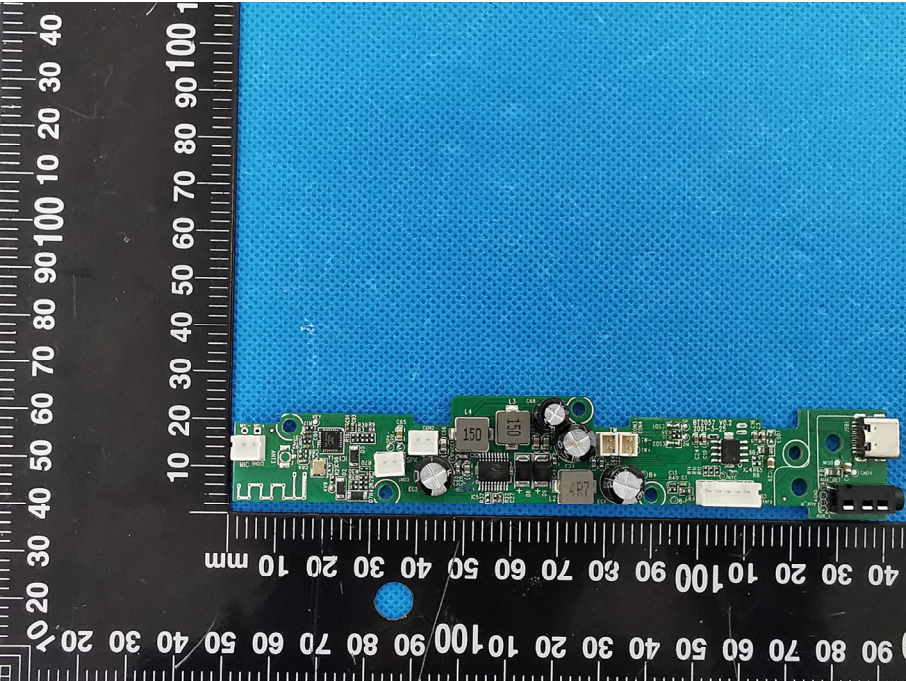

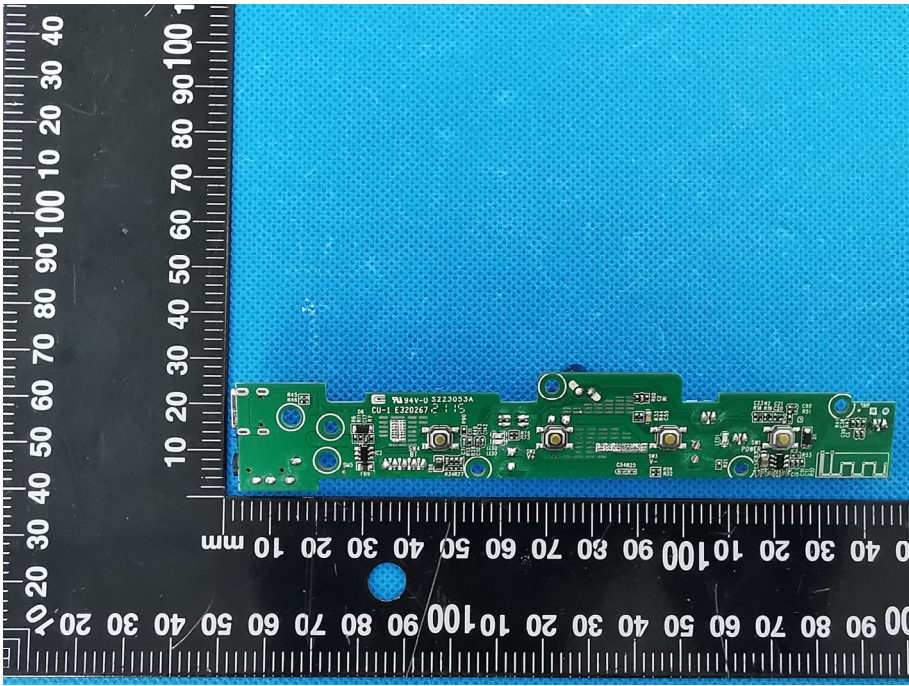

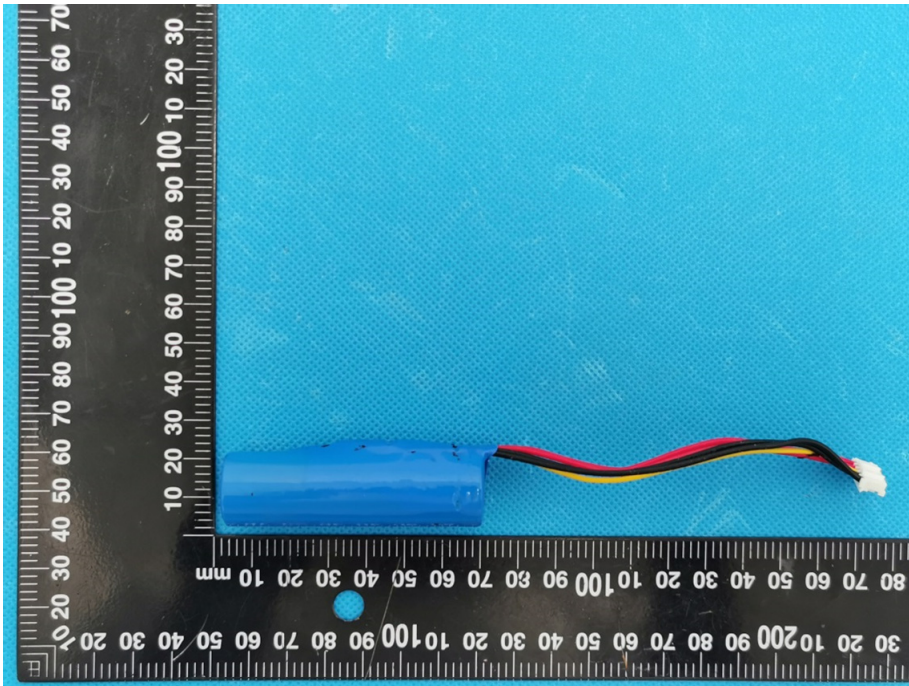

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>This photograph shows the internal components of the EUT housing. The top half of the image displays the black plastic housing with a motor and a cable assembly. The bottom half shows the green printed circuit board (PCB) with various electronic components, including capacitors and integrated circuits, mounted on it. A black ruler with white markings is placed vertically on the left side of the components for scale, showing measurements in millimeters.</p>
<p>Solder Board-Component View 1</p>	 <p>This is a close-up photograph of a green PCB component, likely a motor driver or control board, showing various electronic components such as capacitors, resistors, and integrated circuits. The board is mounted on a blue textured surface. A black ruler with white markings is placed vertically on the left side of the board for scale, showing measurements in millimeters.</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a green printed circuit board (PCB) component with various electronic components soldered onto it. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board is approximately 100 mm long and 20 mm wide. The components on the board include several integrated circuits, resistors, and capacitors. The text "MATERIAL" is visible on the board.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph of a blue cylindrical component, likely a battery or capacitor, with a multi-colored wire (red, yellow, black) attached to it. The component is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The component is approximately 100 mm long and 10 mm wide.
