Detail Spec	
Processor	MTK 8377,1.2GHz

Operating System	Android 4.0
Flash Memory	1G+8G , support extend by SD card 32G
Display	7Inches TFT (resolution: 1024*600, LED Backlight)
Video playback	3GP/MKV/AVI/RMVB/MP4/TS/FLV/WEBM/WMV/ ASF
Audio playback	ogg/wav/wma/mid,midi/mp3/3gp(aac)/mmf/amr
Camera	2.0MP Back camera and 0.3MP front camera
System language	English
Frequency	GSM 850/900/1800/1900MHz UTMS 2100 MHz
Main functions	3G , WIFI, BT
Unit size:	194.0*122.4*10.5 mm
The maximum working temperature	45°C.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or
television reception, which can be determined by turning the
equipment off and on, the user is encouraged to try to correct the
interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that
to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
FCC RF Exposure Information and Statement
The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of
tissue. Device types: TwinTAB-T7283GD1 (FCC ID: 2AALNT7283GD1) has
also been tested against this SAR limit. The highest SAR value reported under
thisstandard during product certification for use at when properly worn on the
body is 0.409W/kg.
To maintain compliance with FCC RF exposure
requirements, use accessories that maintain a 1.0cm separation distance
between the user's body and the back of the handset. The use of belt
clips, holsters and similar accessories should not contain metallic

components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

For portable devices

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device was tested for typical hand held operations with the device contacted directly to the human body to the sides of the device. To maintain compliance with FCC RF exposure compliance requirements, avoid direct contact to the transmitting antenna during transmitting.
