## Conditions

The rear wheel of the bicycle rotates at high speed whilst the trainer is in use. Tests have revealed that the unit will not overheat even when subject to extreme use. However, when subject to prolonged and intensive use, the enclosure around the brake may become very hot. Always allow the brake to cool down before use or before touching it.

Always remove the cylinder from the bicycle tire when the trainer is not in use.

Never brake abruptly when training. When braking the rear wheel, the flywheel continues to rotate which may cause unnecessary wear to the cylinder and the rear tyre.

Ensure the seat is plumb when the trainer is not in use.

Always remove the cylinder from the bicycle tire when the trainer is not in use.

Inspect the nuts and bolts on the trainer on a regular basis, and retighten if necessary.

Perspiration moisture and condensation can harm the electronics. Do not use the trainer in damp areas. Incorrect use and/or maintenance will void the warranty.

This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of appliance in a safe way and understand the hazards involved.

Children being supervised are not to play with the Tacx trainer.

This device is not designed for industrial, commercial or medical applications.

Do not expose the product to water or moisture.

Clean only with a dry cloth. Do not use cleaning solvents or abrasives.

**CE** Tacx bv hereby declares that the Tacx Flow T2240 conforms to the essential requirements and other relevant provisions of directive 2004/108/EC. A copy of this declaration is available on the Tacx website: [www.tacx.com](http://www.tacx.com)

## Nederlands

Tijdens het gebruik van de trainer, draait het achterwiel van de fiets met een hoge snelheid. Testen hebben uitgewezen dat de unit bij extreme prestaties nooit oververhit kan raken. Wel kan langdurig en intensief gebruik de omhulling van de rem behoorlijk warm worden. Laat de rem na gebruik altijd even afkoelen voordat u deze aanraakt.

Klap de rem wanneer de trainer niet gebruikt wordt los van de fietsband.

Rem nooit abrupt tijdens het trainen. Bij het remmen op het achterwiel draait het vliegwiel door waardoor onnodige slijtage van de velg en de achterband wordt veroorzaakt.

Zorg er voor dat de rem tijdens het monteren niet valt. Er zou onbalans kunnen ontstaan die trillingen veroorzaakt.

Open nooit de rem om beschadigingen te voorkomen.

Controleer regelmatig de bouten en bollen van de trainer nog goed vast zitten.

Transpiratievocht en condensatie kunnen de elektronica aantasten. Gebruik de trainer niet in vochtige omstandigheden.

Dit apparaat kan gebruikt worden door kinderen van 8 jaar en personen met een verminderd fysieke, mentale of sensorische capaciteit, ofwel een minderheid, indien ze zijn geïnformeerd en goed begrepen hoe ze de trainer veilig kunnen gebruiken.

Kinderen onder toezicht dienen niet te spelen met de Tacx trainer.

Cet équipement n'est pas destiné à des usages industriels, commerciaux ou médicaux.

Niet blootstellen aan water of vocht.

Alleen schoonmaken met een droge doek. Gebruik geen oplosmiddelen of schuurmiddelen.
