

Label info, First batch

This device complies with part 15 of the FCC Rules and with the Industry Canada license-exempt RSS standard(s).
Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Warninglabel, first batch

Future label, second batch. This label will be used when the batch of the first labels have run out. Product label and warning label are combined in this future label.

See next page for label position info.
