To whom it may concern,

On behalf of our customer Tacx b.v., we hereby declare the following device:

FCC ID : 2AAMI-T2875
Brand : Tacx
Model : T2875

The EUT has 2 transmitters (BLE and ANT+) which never send simultaneously. The highest output power is from the BLE part. The RF exposure assessment is based on the BLE mode. The EUT is considered as 'Mobile' use.

The EUT has a maximum rated output power in BLE mode of 1.3 mW EIRP (0.84 mW conducted) in the frequency range of 2402 – 2480 MHz.

This means that the equipment is in compliance with FCC KDB Publication 447498 D01 v06, 47 C.F.R. §1.1310 and §2.1091 and excluded from SAR evaluation according Table 1 in RSS-102.

Best regards,
TÜV Rheinland Nederland B.V.

R .van der Meer, Test Engineer
