A black, handheld, non-invasive fetal Doppler device is shown against a blue background. The device has a ergonomic, pistol-grip shape. A silver-colored ruler is placed horizontally below the device, showing measurements in centimeters (0 to 100) and inches (0 to 4). The device features a large, circular, black sensor head at the front, which is connected to the handle by a black cable. The handle has several white, curved, ribbed sections for grip. A small, gold-colored button or indicator is visible on the side of the handle. The overall design is sleek and professional.
