

China Electronics Shenzhen Company

FCC Class II Permissive Change Request Letter

2019/05/30

To FCC:

RE: FCC Permissive II Change Request for Company: China Electronics Shenzhen Company
FCC ID: 2AAQFS23

We are submitting an application for a class II permissive change to the FCC approval of the Company name: China Electronics Shenzhen Company, product description: Bluetooth Speaker (FCC: 2AAQFS23, Original Grant Date: 04/03/2017). The transmitter module itself has not changed. Here are the changes:

We only sold 50PCS to US market as sample order in 2017 and now we already stopped selling this item.

The sample which we sent to you for annual Post-Certification surveillance by the FCC was sample which we made for a Brazil customer as presentation sample due to no inventory. There is why the sample could not meet FCC requirement. Now we have reassessed all test items, and the maximum output power also has been corrected.

FCC response on 04/10/2019

The device cannot be dismissed since it was already sold.

Please ensure the device still complies with all requirements. If so, and when you are ready to file the Class II permissive change for the purposes of correcting the maximum output power, reply back.

The class II permissive change needs to include the attestation letter from the grantee that they did not make any changes and that the CII PC is to update the maximum conducted output power. Please reply back when the CIIPC is ready to be filed or if the device does not comply with other requirements.

Sincerely,

深圳中电投资股份有限公司
CHINA ELECTRONICS SHENZHEN COMPANY
