

Safety Information

- Do not let liquids contact with the router. If this happens, wipe the router with a dry cloth immediately.
- Do not use thinner, alcohol, benzene or other chemicals when cleaning the box.
- To avoid electrical shock, do not disassemble the case.
- To prevent overheating and damage to the router, avoid placing router in areas with dust and sand.
- To avoid areas with strong magnetic fields, do not place the router near metallic objects or similar environments.
- Do not place the router under direct sunlight or expose router to extreme temperatures.
- Do not drop, hit, or place heavy objects on the router.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Operations in the 5.15-5.25GHz band are restricted to indoor usage only.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all WiFi product marketed in US must fixed to US operation channels only.

WAP-7530 Dual Band Wireless Router

Quick Start Guide

Panel

- 1 Power LED:**
Off : No power
On(Green Light) : Device is ready.
- 2 5G Signal LED:**
Off : No 5GHz signal.
Flashing (Red Light) : Wireless system is ready.
On (Green Light) : The device or station has successfully paired with this AP.
- 3 2.4G Signal LED**
Off : No 2.4GHz signal.
Flashing(Green Light) : Wireless system is ready.
- 4 WPS LED:**
Green Light: Device is ready.
Flashing Green Light: WPS is processing.
- 5 Power (DC IN) Port:**
Connect your router to an AC socket with the power adapter.
- 6 WAN Port:**
Connect a network cable into this port to establish WAN connection.
- 7 LAN 1~3 Ports:**
Connect a network cable into these ports to establish LAN connection.
- 8 WPS Button:**
Pushing this button will initiate automatic pairing.
- 9 Reset Button:**
This button resets or restores the system to its factory default settings.

1 Installation

Wired Connection

1. Plug in power adapter.
2. Use a network cable to connect modem and router's WAN port.
3. Use a network cable to connect your computer and router's LAN port.

2 Router Set-up

Your Wireless Router comes with an intuitive web graphical user interface (GUI) that allows you to easily configure its various features through a web browser such as Internet Explorer, Firefox, Safari, or Google Chrome.

Login to Web UI

1. Manually key in the wireless router's default IP address (**192.168.1.254**) on your web browser.
2. On the login page, key in the default user name (**admin**) and password (**admin**).
3. You can now use the Web GUI to configure various settings of your Wireless Router.

Wireless Connection

Method 1: Manually connect to the network

1. Plug in power adapter.
2. Use a network cable to connect modem and router's WAN port.
3. Connect your computer or mobile phone to router via WiFi:
 - ▶ SSID: **TTL_7530_5G** or **TTL_7530_2.4G**
 - ▶ Password: **00000000** (default value)

Method 2: Use WPS to connect to the network

(Do not use WPS if the wireless network has not been encrypted)

1. Press down on the WPS button on router until the WPS light flashes green indicating that the WPS pairing is in progress.
2. When router WPS light flashes green, start the WPS pairing on your wireless device within 2 minutes, or follow the instructions on the wireless device to set WPS.
3. Your wireless device will start scanning and will connect to the router's wireless network. When the WPS light on router stops flashing, the device and router has successfully connected.
