MODULAR APPROVAL LETTER

FCC ID: 2AATL-H158A-S

Dear Sir/Madam,

In according with 47CFR 15.212 Modular Transmitters and KDB 996369 D01 'Module Equip Auth Guide v02'. FCC ID: 2AATL-H158A-S has been examined against the following requirements.

Modular Approval Requirement	Yes	No
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	The product is produced with permanently attached RF shield during production.	
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	The product buffers the modulation and data inputs ensuring compliance with regulations	
(iii) The modular transmitter must have its own power supply regulation.	The product incorporates regulators to ensure operation in specified range.	
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable). The "professional installation" provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	This product integrated with PIFA antenna.	
(v) The modular transmitter must be tested in a stand-alone configuration	The product was tested in a stand-alone

	configuration (placed on development/interface fixture) without enclosure.	
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	The product has required labeling placed on the module and instruction for placement on exterior of end product.	
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	The product fully complies with all specific applicable rules and regulatory precautions are addressed in manual.	
(viii) The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	The product complies with applicable RF exposure requirements. Installation and RF exposure precautions are addressed in manual.
